

# UN-COP29 the Most Irresponsible<sup>.2024/11/13,14</sup>

Conscience scientists group has been warning on the UN-IPCC irresponsibility for the decisive, imminent and fatal **Arctic Methane Risk**. Not only scientists, but anyone can insight the awful risk. It is certain that salvation needs difficult geo-engineering, etc, however it can not be told entirely impossible. Do you really want coming mass extinction ??, or ....

You may say, everyone will not do, so also I can not ...  
You may say, if everyone will do, also I will...

① For an example, someone's responsible make the **BEST AI** for the asking.  
What is the best must be determined by **opened test** on justice, truth and brotherhood, and by global voting with evaluation on the test results.

② And everyone all the planet inhabitants ask the AI at once and .....

## Arctic Sea Ice Graphs

**Arctic sea ice vanishing will fire mass extinction bomb in the sea floor !!!.**

By following graph, our possible awful future could simply be estimated,

### Time for Ice 100% Vanishing.

This is the lowest portion of Arctic Sea Ice Extent in 2012~2023. 1mesh=100,0000km<sup>2</sup>.

In this 10yeras, about 1.5x10<sup>6</sup>km<sup>2</sup> had been lost.

Time for Ice 100% Vanishing by a simple linear estimation is (3x10<sup>6</sup>km<sup>2</sup>/1.5x10<sup>6</sup>km<sup>2</sup>)x10y=20y.

The actuality is non-linear by many climate, ocean etc positive feed back factors, That is, Arctic Methane Firing Time is less than 20yers(2044).

### **Sea floor Methane Reservoir.**

100-9000 Gt C: Kvenvolden

<https://aslopubs.onlinelibrary.wiley.com/doi/10.1002/Ino.10307>

CH<sub>4</sub>=802kJ/16g(C=393KJ). This is energy for **fireball earth** warmed both by the Holy Bible and Norse Mythology.

Note time for summer solar heat reaching sea floor is not long, but rapid.

Also note **solar heat** by midnight sun in Arctic summer is stronger than equator.

**Arctic Methane Emergency Group (AMEG)....May 14, 2012**

**Blog of AMEG, the Arctic Methane Emergency Group, discussing the situation in the Arctic and the action necessary to avoid catastrophic warming, including the need for **geoengineering** to be accepted as an indispensable part of a comprehensive plan of action to cool the Arctic and to bring the atmosphere and oceans back to their pre-industrial state.**

## ***The Arctic Methane Monster's Rapid Rise***

<https://arctic-news.blogspot.com/2014/08/the-arctic-methane-monsters-rapid-rise.html?m=0>

Researcher Jennifer Hynes recently gave a frightening presentation about the situation in **the Arctic** and the odds that things will rapidly spiral out of control soon, escalating into runaway global warming a few decades from now

PS:Coming President D.Trump with Mr Elon Musk,Mrs Tulsi Gabbard should invest **AI the BEST** for saving not only USA,but also for the World .They could be real Hero & Heroine!!!.

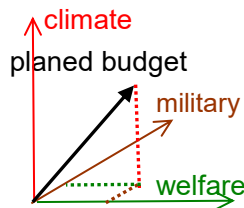

PS2:Once Author worked for eliminating extremely expensive elementary particle experiment device(12B\$-SSC,USA-1993),since then he had become terrible poverty,even now ,not getting portable phone,which is necessary to get free AI.

## APPENDIX-0;Why AI at now Can Become Universal !.

Coarsely to tell,it is due to entirely the same **Natural Principle of RECOGNITION**.

A recognition is judgment of *Yes or No* for statement truth "*A(question) is B(answer)*".

*Similarity* is told *distance* by *near* or *far*,so *Recognition* is digital judging in comparing by measuring distance between **task** and each projected **components**(..... dot line).

all the arrows length are unit=1.Component arrows are orthogonal with each other(**3dim Orthogonal Vector Space**).This is extreme coarse explanation of **Digital Decision** by yes or no.

Question:What is the purpose of the planned budget ?

Answer:The largest projected component is climate !

①Our thinking is employing words and picture,which are a series of alphabet block,etc.and figure of distributed color dots ensemble. All of those elements are described and searched as **vector** in multi-dimensional vector space.

②Extracting common feature(nearness measuring)enable establishing **abstract conceptions** by massive learning.This is entirely same of **our knowledge(words and picture)** for **thinking and decision**.

\*CPU never complain for **any massive learning,and thinking**(any massive searching),however they eat massive electrical power,thereby,less power consumption device and system is urgently necessary.

Or big carbon-less high efficiency electrical power system is needed.

☠ : good thinking may be **massive searching**,thereby,for the massive searching needs massive learning.

AI principle is invariant,while massive learning for massive searching become best AI.

\*author is not expert on AI,then his an idea is compressing vector dimension by high efficiency assignment of those(especially language)for reducing computing time.

③AI can learn even the Bible and anything else.*Then* we can make and ask super AI on the **Best Answer on the Most Difficult Problem of Mankind at Now.**

<http://www.777true.net/Uniqueness-of-Language-Vectorization-by-the-mathematical-structure.pdf>

## **APPENDIX-1;What should be loaded for the BEST AI ?!**

It must fundamentally be on board by the principle of justice,truth,and brotherhood.

And more over those,it must be on board by full correct knowledge of the world.

The purpose is to enable **the AI universal** for all the reasonable engineering demands.  
and for demands on all the reasonable managing people .

Then author can warn you that **now global science authority** has been entirely neglecting science the inconvenient for the status quo ruling now world .It is called suppression on truth.Those as for author had been written in this *777true.net* since 2007.Following are indispensable important items,so it is not only authors selfish profit,but also for all.

A scientific fact is completely independent from any person.

This is the most troublesome and disputable problem, however the facts are decisively most necessary to correct the fatal errors to recover healthy world.
