

Dear Death Penalty, but Innocent Planet Prisoners !!,

Now the highest priority problem in climate change catastrophe is absolutely evading the tipping point of no return by CO2 reduction rate 80% !!!,

Above all, we emergently stop ice cover melting in Arctic, where huge amount of thermally unstable methane clathrate reservoir of 400GtC~1000GtC lie.

Then 10GtC releasing to atmosphere is told catastrophic. In the hot year of 2008, the ice cover in North Pole had disappeared for the first time in the history.

Then how do we ???, Answer may be as follows.

*death penalty in global gas chamber due to neglecting the fact.

*making global consensus on rationing on fossil energy of **20% rate** as minimum life.

Above all, there seems optimistic opinions that the crisis could be evaded by technical reforming ways in USA, however we may have not sufficient time for accomplishing technical ways which need also more fossil energy. Now the time may be the final decision making to evade the tipping point of no return by CO2 reduction by anyhow. Maybe the decision making by USA would determine future global destiny .

with best regards. motoji-suzuki(2008/1/19~2/5).

PS: Certainly the **20% rate** as the minimum livelihood is to enforce many people extremely severe way of life, however the damned death penalty in global gas chamber may be far terrible and severe way of life, We could not opt instant death without suffer in such situation. Then which do you opt ??.

Now people encountering unprecedented economic downturn and bitter life are mainly worry about financial crisis. Its very very natural, in anyway and above all, people can not help to secure food and home to live.

However there is another unprecedented and outrageous problem hidden, which is opting survival or suicide.!!..The very very inconvenient reason is described in the below. Any person could not survive without drastic exchanging their thought in way of life. Please present this outrageous inconvenient facts to persons the statemen and to all of people. Already scientists had known it well.

Above all, president, prime minister, and leaders of any organization must confess this unprecedented and outrageous difficulty to all of the people on this prison planet !!!!!!!.

Tell them the severe facts of now world without hesitation and with indicating hope !!!.

-Please listen the most inconvenient facts-

I must tell you very very inconvenient emergent facts on the climate change crisis(CCC), Most of people has been considering so called global warming is gradual process in many decades, however the actuality is not such optimistic, but would be **abrupt catastrophe** in decades with certain probability. Then note that you should not obey what IPCC scientists had told to you of the world. For example, **Kyoto protocol proposed 5%**, but the effective actuality is such high as **80 % .!!**,. The details are described enclosed PFD(**Global carbon budget the reality, or** <http://www.geocities.jp/sqkh5981g/Carbon-budget-reality.pdf>). Until the end of 2007 when author encountered **Jucelino Nobrega da Luz the great Brazilian prophet**, <<http://www.jucelinodaluz.com.br>> in Japanese TV show, also he same as most of you has been considering global warming is gradual process in many decades.

In 2043, 80% mankind would be extincted mainly due to the CCC, he revealed. Then he said also December/31/2007 is the time limit for people's making decisive mind. (In next 2008, the ice cover of North Pole had disappeared for the first time

in history). From the day to until now, author has been surveying climate change science with physical knowledge and have concluded it almost affirmatively. Although uncertain factors are left. **Then note that our future can be changed by our decisive mind making !!.** Therefore our possible way could not help to be **to survive with allowable Carbon 20% of the minimum livelihood.**

Certainly, certainly it is outrageous for advance nation people deeply constrained wasteful life for long years. It is same as ordering to one who has nothing symptom awareness to rest bed absolutely for long time until their recovery. Especially entrepreneur the capitalists would not agree, because their activity would become impossible by such 20%. However, however, the claim should be thrown toward the realities, but not toward author.

It is the absolute order employing **global war time regime of rationing on fossil energy.** Or would you really opt suicide ?.

Once you had now missed decision making chance, then you would see **clearly abnormality of climate change in near future**, and then you would agree employing the regime, It shall be too late, since the state would not recover anymore by spontaneous temperature rise by so called feedback process. That is, temperature rise **enhance natural GHG eruption** which enhance more temperature rise.

Especially huge amount of thermally unstable methane clathrate melting and eruption in shallow Arctic continental shelves would be fatal.

<<<http://www.sciencedaily.com/releases/2008/09/080918192943.htm>>>

The process could not stop until encountering saturation point of catastrophe. See future hell of the world.

<<<http://www.timesonline.co.uk/tol/news/uk/science/article1480669.ece>>>

See past hell of the world<<Permian mass extinction by methane eruption by M. Benton, "chap 11 in When life nearly died, Thames&Hudson, 2003, UK">>.

Then how to make the global consensus for such unprecedented and outrageous problem ???.

-A possible answer by author(**phase transition method**)-.

It was an unprecedented event that people in USA had accomplished the success in grass route movement for president election by amateur people's unite with an object. Since any former presidents had been always connected with so called the establishment powers in USA. Such situations also has been seen also in Japan.

A making an ordered arrangement in random orienting people is a **phase transition** in physics concept term.

Originally it is called phase transition that water become ice or ice become melting to water by temperature change caused by heat input or output. Then coexisting of ice and water is called **critical point in phase transition in 0°C** temperature in normal pressure. Also then remarkable phenomena could become possible to yield so called **supercooling water** in under 0°C temperature.

Those must originally become solid ice, but remain still as liquid water. However then those show dramatic change into solid ice suddenly caused by external mechanical shocking..

PS: Generally to tell, an ocean has overwhelming heat capacity, so the 1°C heat up time has been considered in decades or in hundreds. However Arctic ocean is entirely singular due to its 0°C feature in average sense. Since 0°C water with ice has **nothing dynamic heat capacity**, but those transfer only heat to ice or from ice.

This fact become serious factor in abrupt ice melting or abrupt methane eruption.

Now back to emergent problem the our most concerned, to tell for it, what is the external mechanical shocking ?.

It is global synchronous confessing the fact of emergent crisis to all of the people by Leaders in each nations.

It may be the very final chance to relife !!.,

Full stimulating of global peoples wisdom would create excellent ideas !!!.

PS: In other words, the current situation of now world dominated by so called established mass media, they has been closing the facts, which would cause mass extinction in future. Certainly now the current world is told to be dominated by persons who accelate crisis of climate change into hell. Then would they intend to own survibe or or own extinction ?,

Yah, they merely has been still cooling water (**total synchronous paralysis**) due to current momentum of capitalism the prosperity illusion and pride in high status, but the causing own extinction, which originally must be solid ice.

Therefore we must entirely beat and beat them to awaken without any hesitation.

It is real relife also for them.

PS: Maybe 50 years ago, we could live in very poor with almost the 20% fossil energy,

however to tell as for author, he could not remember unhappieness at that time.

Only exchanging our thought enable our survibal. Yes we can !!!!!.

Only exchanging our thought enable our survibal. Yes we can !!!!!.

PS :See also our website "B wave power generation method".

Unless relieving possibility,author never tell this outrageous inconvenient facts.

For example, CO2 could be sinked by **making deserts into artificial forestization.**

See this website.<<http://www.yamanashi-nponet.jp/~desert/inochi.html>>.

<<http://www.rmaf.org.ph/Awardees/Citation/CitationToyamaSei.htm>>.

Yes we could !!!!!.,Yes we can !!!!!.,Yes we can !!!!!.,Yes we can !!!!!.,

truly yours, motoji-suzuki.
