

#1-The Deadly Climate facts-IPCC never tell !!! 2015/10/25; **Do,or Die !!,Mending on Deadly Climate_#1-Problem,#2-Solution,#3-Reaction.**

This is deadly problems of **do,or die**. **The deadly stupidity has been ruling on now world toward global mass extinction before 2050 !!!.**

However,these facts could be noticed by **you-yourself the amateur observers** on recent climate changes in **the last 5 years** with global temperature rise~**0.1°C** or more.

*more supplemental explanations are here: http://www.777true.net/Do-or-Die_Climate-Mending_the-explanation

(1)**2°C rise** by Copenhagen 2009 is **a Recipe for Disaster !!..J.Hansen**
The energy of global **0.1°C rise** is about hurricanes **400units**.
You may feel **recent 5 years climate**(with temperature rise **0.1°C**,or more)
becomes **wild and record breakings** almost regios in the world !!!.

(2)**Unless Emergent Arctic Cooling, Methan Catastrophe**
would become fireball earth before 2050....AMEG & 777true.net.

Now Arcitic Ice vanishing is on **positive feedback**
ice melt causes **more sun heat input**
into ocean,which causes **more ice melt**.
The sea flor temperature rise would cause
eruption massive methane the strong GHG.

<http://arctic-news.blogspot.jp/2013/10/just-do-not-tell-them-the-monster-exists.html>

#2-Climate Mending, **do, or die !!**

(1) **More than 80%CO2 cut**<non Carbon Energy>

I :**Wind(Marine Wave power)Turbine** with H₂O generation(org-hydride reservor).

<http://www.hrein.jp/english/about%20organic%20hydride/index.htm>

https://www.chiyoda-corp.com/news/en/2013/post_77.html

https://www.google.co.jp/search?q=marine+energy&es_sm=93&tbm=isch&tbo=u&source=univ&sa=X&ved=0CDAQsARqFQoTCN7P_cmv7MgCFQXLYwodGpwNvw&biw=1366&bih=635

<https://www.google.co.jp/search?q=hydro+power&espv=2&biw=1366&bih=635&tbm=isch&tbo=u&source=univ&sa=X&ved=0CCYQsARqFQoTCMfX4dbO4cgCFEMppgod3tcKzg>

II :Solar Power. Solar Water Heater is effective !! =note boiling water(**bath**) is highest energy!!

III:Hydro Power Generation & Geothermal Power Generation.

IV:Nuclear Power. → APPENDIX-5

V:Full effective using of flammable gabage,

V:Energy Creation by Charge Desity Wave(N.Tesla,Stanley Meyer !!)

The physical principle had been reveald by recent physics.

(2) **Arctic Cooling Geo Engineering**=how to stop ice melt !!

I :Summer Insolation cut by cloud generating by spreading CDNC(**AMEG!!!!!!**).

Climate 'tech fixes' urged for Arctic methane 17 March 2012

<http://www.bbc.com/news/science-environment-17400804>

II : "1" dimensional **Ice wall building** by spreading sea water in sever cold winter operation.

die, or do = Revolution from **BUSINESS** to FREENESS != Downsizing Life Way!

:System Design toward **Global Climate Wartime Regime**:

→ climate science facts <especially **emergency in Arctic Methane Risk**>. → Trouble portions.

→ **I, II: Mending** method <CO2cut & Arctic Cooling>. → **III: Modification** on life way of people

* **I, II**: Arctic Cooling has no relation with general people, but **emergent** global Arctic Cooling operation is decisive.

III: Modification on life way → **emergent conversion** to non-carbon energy life with downsizing life way.

IV: Only **Global Wartime Declaration** enables **emergent and global Regime Conversion** from **business as usual** to Climate Wartime Regime.

V: Only well-made Global **Climate Wartime Plan** by GHQ enables minimum chaos in the conversion.

* GHQ = World General Head Quater <policy makers (commandants) with sub of scientists, engineers, economists, military men etc>

I, II: The main **Technical Tasks** = { **Arctic Cooling** , **Non-Carbon Energy** }.

This is nothing, but very heavy load for the Economy Regime = Big Wartime Cost !

III: The main **Economics Task** = **By anyhow, we can eat !!, this is the best in climate wartime !!!**

= Peoples Life Assurance Economy with the load of Big Wartime Cost !

* **Big Wartime Cost** = **Big Business Demand** !

* **downsizing life way** = **New Culture Building** = **New Business ? X, Freeness Demand**

it is not that only money can do, but enough free could somethings good.

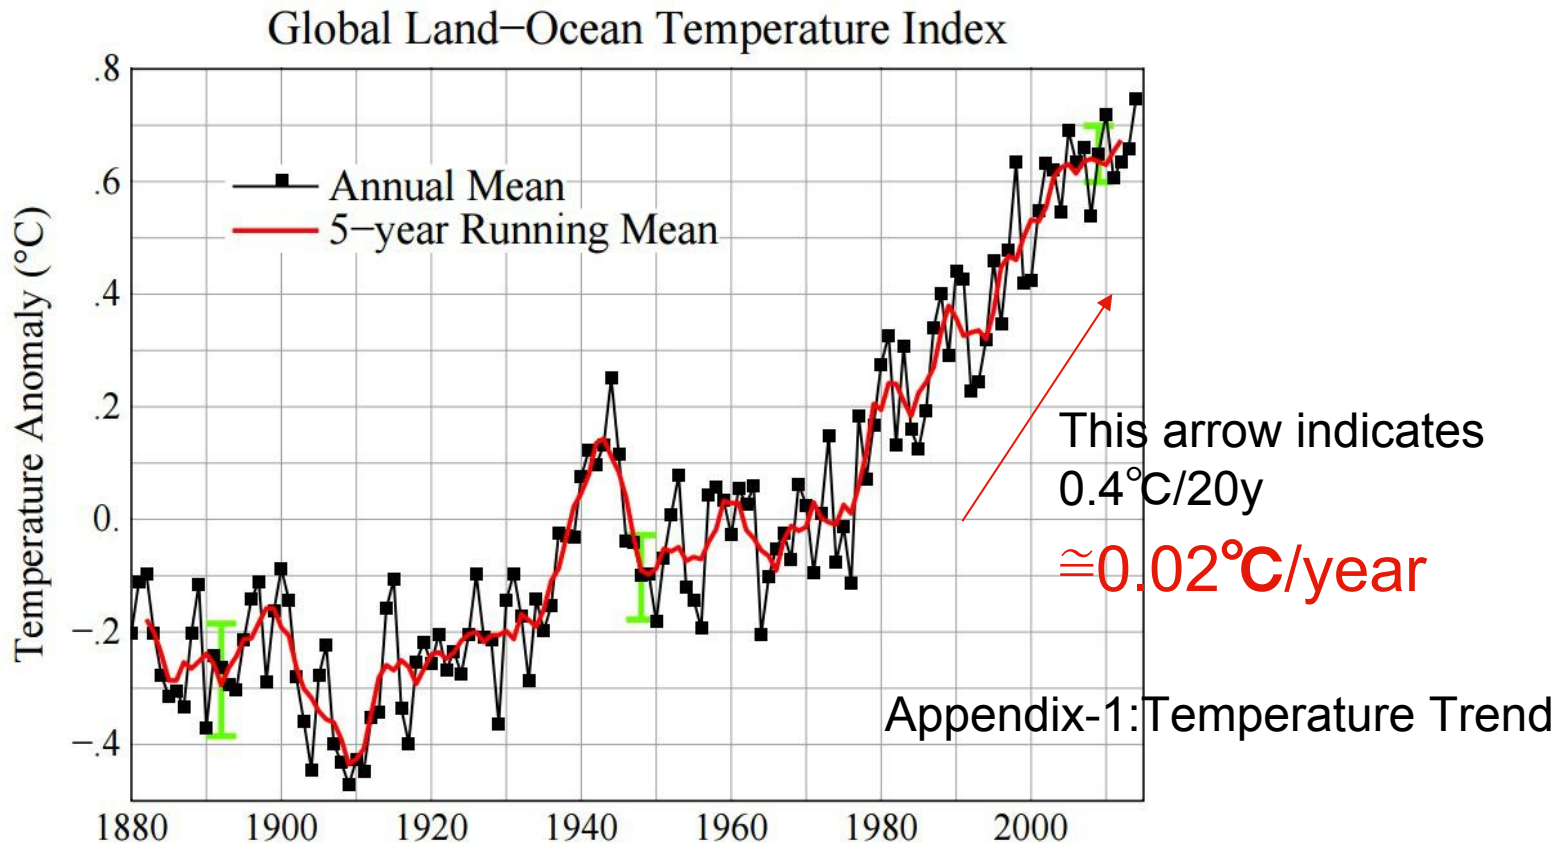

* **Jobless** → shorten working time and salary

= **Sharing Works with Income** → enough free time → enabling many something good

<**ever lasting Ramadan Festival ! !**>. → **Massive Returning to Agriculture Age !!!**

#3-

- Blank

http://data.giss.nasa.gov/gistemp/graphs_v3/fig.A2.pdf

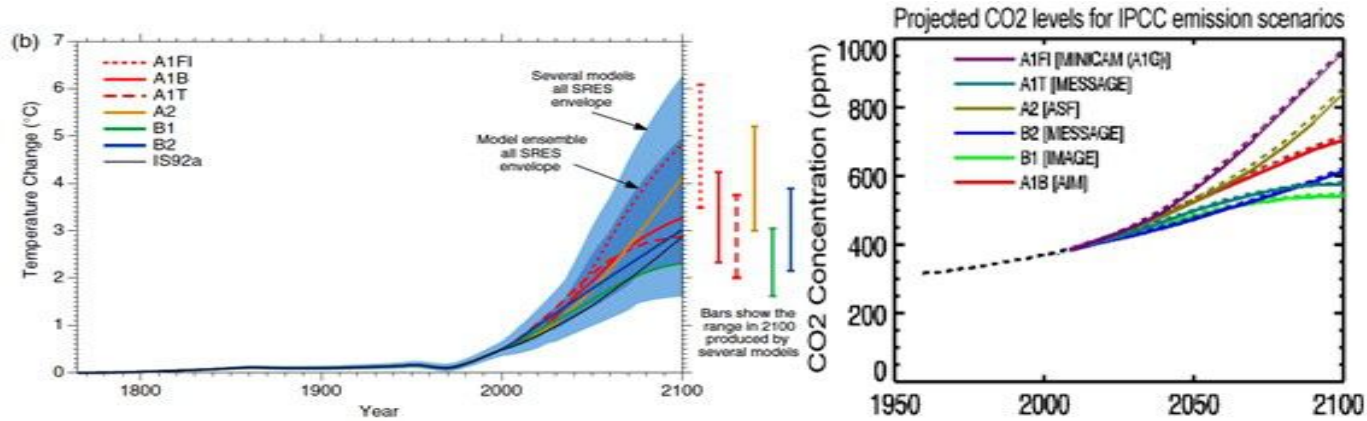

Of course all the energy of **0.1°C rise** never become all hurricanes !!

<http://www.777true.net/0.1C-Temperature-Rise-could-cause-Climate-Wild.pdf>

* 0.1°C Global Temperature Rise \cong 8.6×10^{22} Joule heat energy increase

* How much energy for making a hurricane ? \cong 1.8×10^{20} Joule.

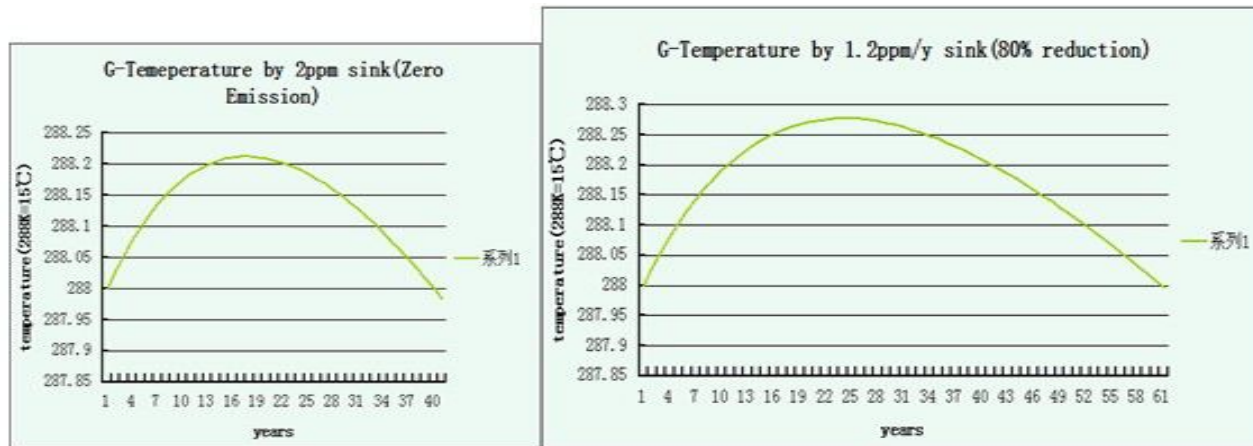

IPCC projections never **return** stable temperature at now !!.

<http://www.skepticalscience.com/ipcc-overestimate-global-warming.htm>
<http://www.skepticalscience.com/ipcc-overestimate-global-warming.htm>

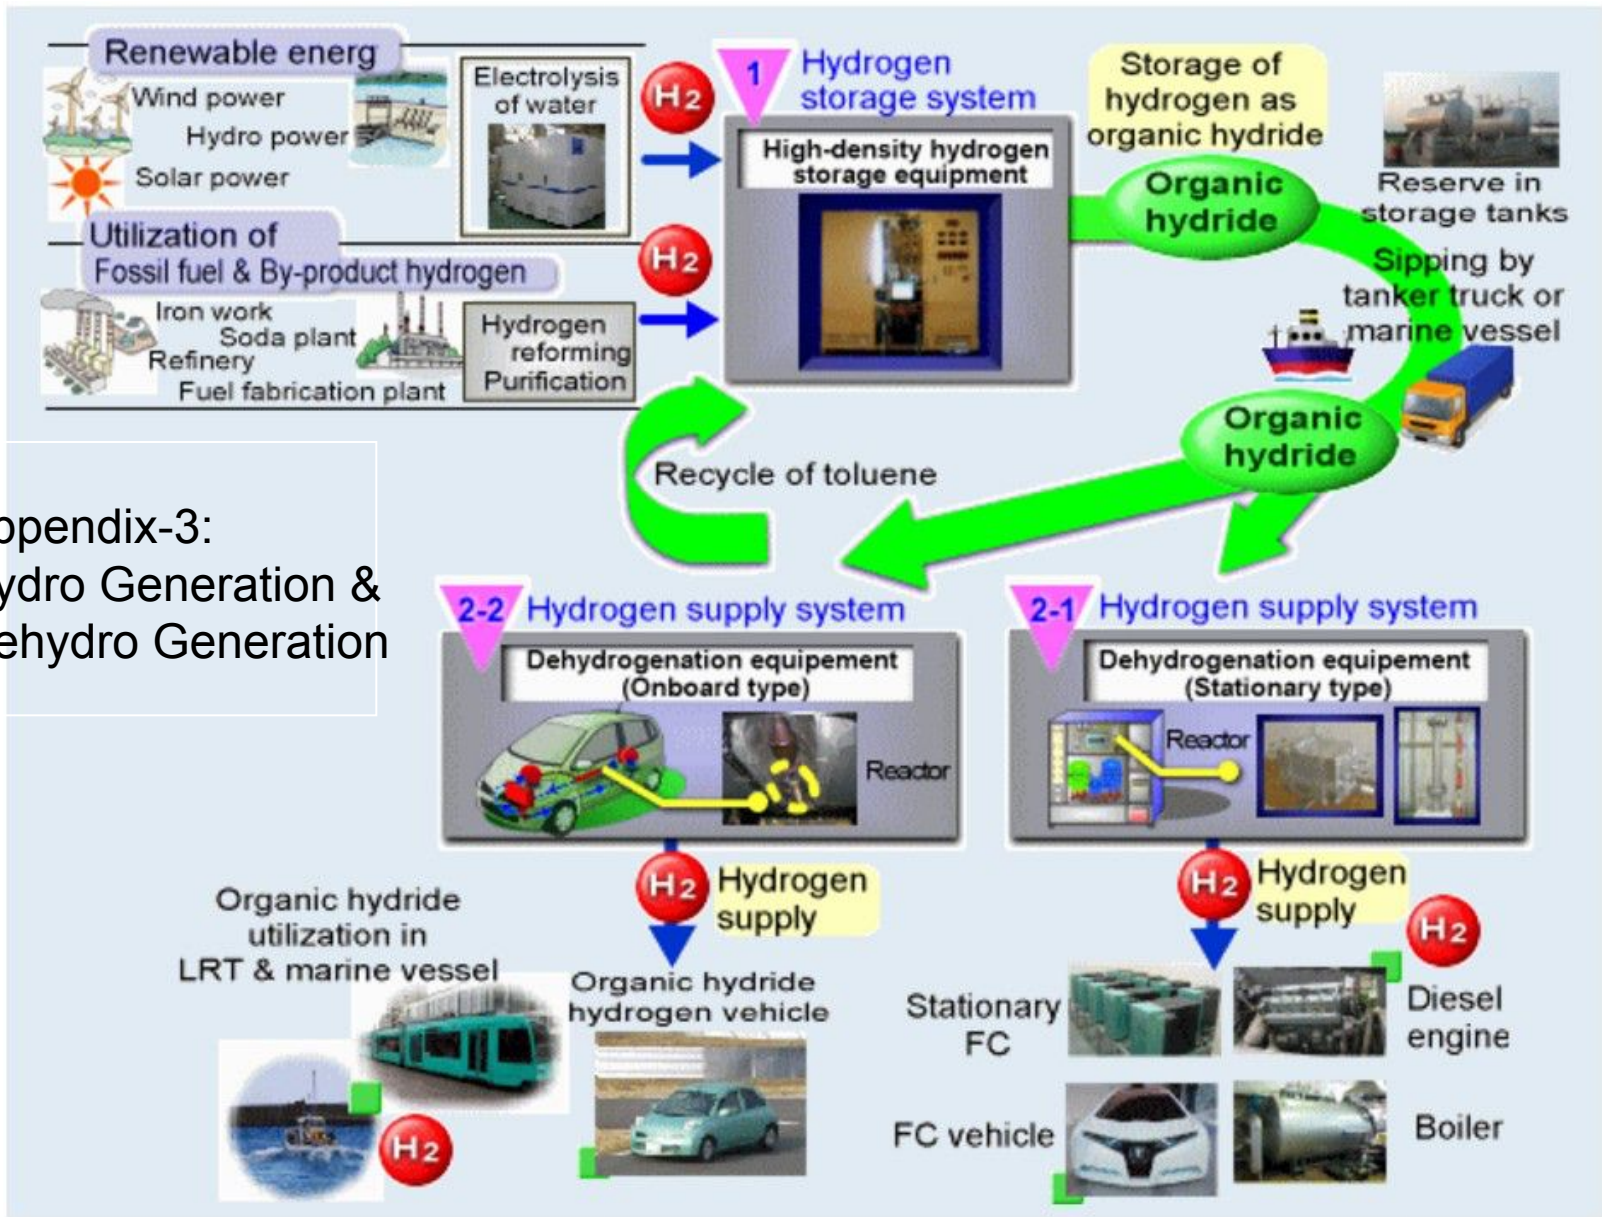

Below is 777true.net simulation by the verified method toward 350ppm from 400ppm at now .

<http://www.777true.net/Accounting-principle-verify-reconstruction-the-Past-Climature-Records.pdf>

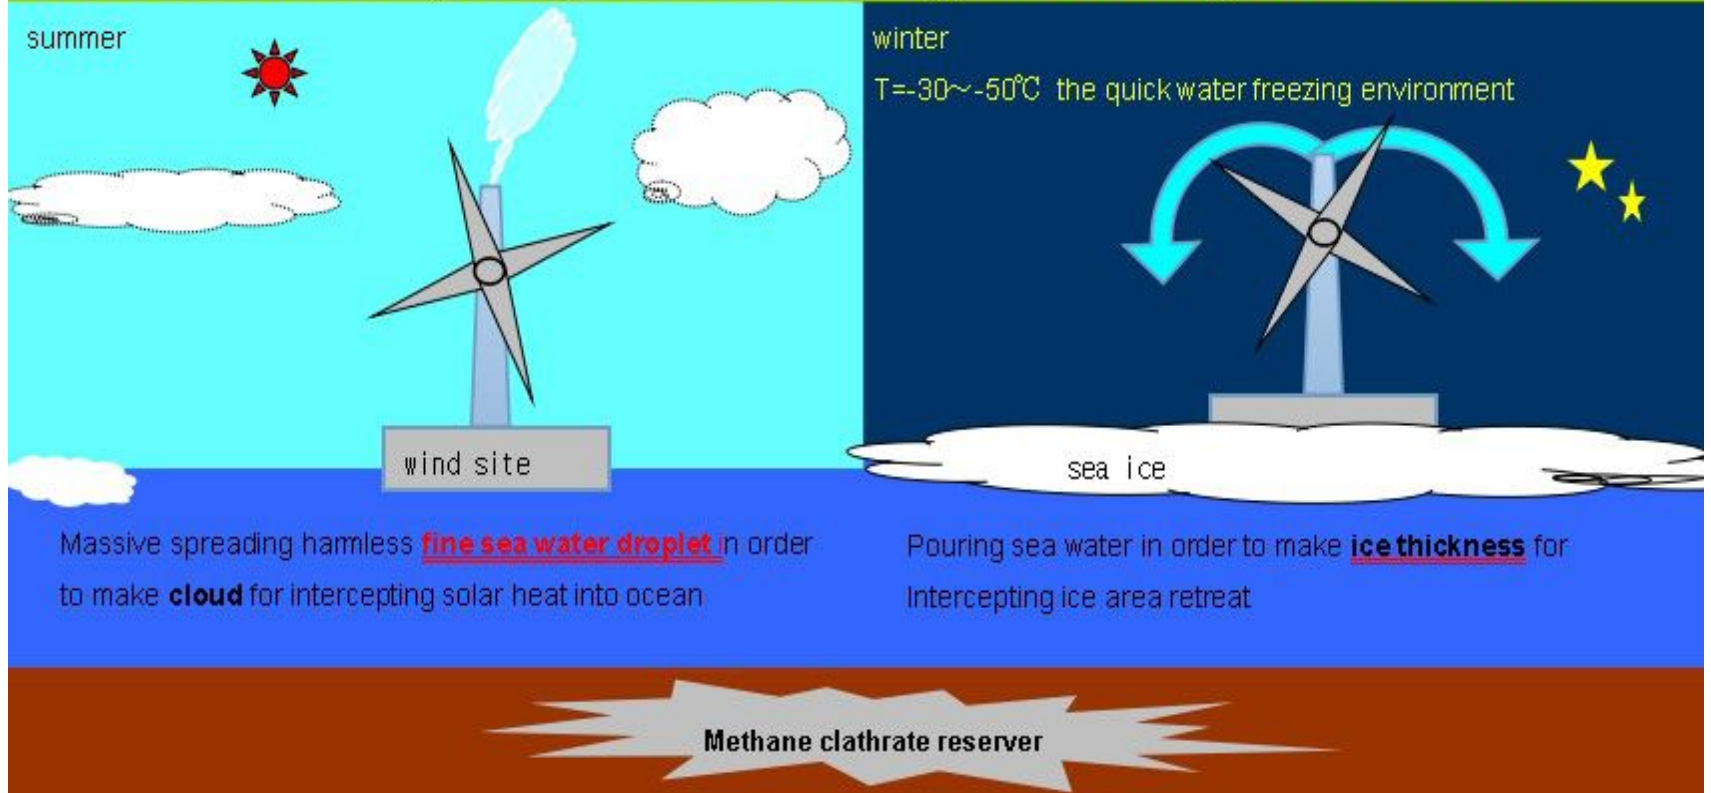

Appendix-2: Temperature Projections

Appendix-3: Hydro Generation & Dehydro Generation

ARCTIC COOLING Geo-Engineering in summer and winter type **the most emergent our task at now!!!!**

Left is insolation cut by cloud generating by spreading sea water salt becoming CN(cloud nuclei).....*Prof Stephen Salter*

Right is ice thickness increasing by spreading sea water in cold severe winter operation.

1 dimensional sea water spreading could **reduce pumping units**.

7000Km/100nations troops = increasing and keeping ice wall of 70Km length/each nation.

*Arctic sea ice minimum extent 2012 was 3.4million square kilometers

The **surrounding(circular)length** might be about = $2\pi (3.4 \times 10^6 \text{Km}^2 / \pi)^{(1/2)} \sim 7000\text{Km}$.

In fact, our final aim is keeping sea floor water temperature lower by keeping minimum ice area in summer. Then the length of surrounding could become really shorter to be realizable?. By anyhow this task must be emergently surveyed by engineers with Arctic experts who know well at that place !!.

Appendix-4: Arctic Cooling

Appendix-5:Nuclear Energy: assessing the emissions

<http://www.nature.com/climate/2008/0810/full/climate.2008.99.html>

CO2 emissions produced over the entire lifetime of the plant.

Sovacool believes the mean of 66 gCO₂e/kWh to be a reasonable approximation

coal-fired plants emit 960 gCO₂e/kWh,

natural gas-fired plants, at 443 gCO₂e/kWh.

solar photovoltaic, at 32 gCO₂e/kWh,

onshore wind farms, at 10 gCO₂e/kWh..

APPENDIX-6:Nations towards a 100% Renewable Energy Society.

In 2015, Uruguay will produce 90% of its electricity from renewable 01/09/2013

<http://www.greenetvert.fr/2013/01/09/en-2015-luruguay-produira-90-de-son-electricite-grace-au-renouvelable/70728>

Beginning in 2015, Uruguay could become a world leader in the field of renewable energy, with production dominated 45% by hydropower, 30% wind and 15% biomass.

Is 70% Percent Renewable Power Possible?Portugal Just Did it For 3 Months.

III:Arctic Cooling Technology

Climate 'tech fixes' urged for Arctic methane 17 March 2012

About 100Towers.

<http://www.bbc.com/news/science-environment-17400804>

Save the Arctic sea ice while we still can! 2015/03/06

<http://arctic-news.blogspot.jp/2015/03/save-the-arctic-sea-ice-while-we-still-can.html>

Fortunately researchers are increasingly confident that a stratospheric aerosol haze, produced from sulphur dioxide, SO₂, could provide significant cooling of the Arctic for modest expenditure of **the order of a few billion dollars per year**. This type of cooling could be replaced by cloud brightening using ultra-fine seawater droplets when the technology is ready for large-scale deployment within a year or two.
