"This is not a distant reality to anywhere in the world," Repollo wrote to Common Dreams, "unless we change the system that feeds [on] hunger, injustices, and climate catastrophe."

[1] : **Not it's too late, but nothing substantial effective countermeasure !!.**

(1) **the Over View:**

In fact, victims by worsened climate has been increasing on in the world, however they have been still minor, who can not be enough to change the global oil regime. Then also the major had noticed recent year's climate becoming wild, however also even such who can not be enough to change the global oil regime. Extravagant major they can not imagine the world **without oil**. They especially in advance nations has been too accustomed for massive oil consumption civilization. Denying the civilization is also denying their life way. Above all, once they looked massive the others, who seem entirely no problem without climate countermeasure. The world will not be changed toward tackling against climate crisis. Now the major world people substantially has been paralyzing on even with facing deadly climate crisis which would lead the world toward climate hell one by **global extinction**.

(2) Now **climate scientists society** has substantially been **desperate silent** on deadly climate, major of who had recognized it's too late.

But it is terrible wrong. Their desperate is due to **climate positive feedback** such as **Arctic warming** leading to methane catastrophe (global extinction). **Positive Feedback** is "ice melt is to cause more sun heat into Arctic ocean which accelerate more ice melt toward the sea floor or warming, which is to cause massive methane eruption at last. **Certainly now we had been destined to global extinction by methane catastrophe. However there is a supreme method of intercepting the vicious feedback. It is called Arctic Cooling Engineering.**
We are not too late.

(3) **We had already gotten also certified non carbon energy technology.**

It is also certain and pity fact that we can not decrease CO2 emission, but the reality has been increasing CO2 emission even by 20 years long international negotiation efforts.

However it is due not to technological absent, but policy absent.

(4) **True small story of The Climate now becoming terribly stupid, but terrific !!.**

Once upon a time America, there was an oil merchant, who sold and sold oil to accomplish his monopoly in America with motorization at that time. Soon he had become **emperor**, not only for America, but the world. Now he had **win unprecedented power** against the world. In mankind history, from behind, by **his outrageous wealth power**, he has been ruling **negotiating organizations** as governments, United Nations, many international private organizations, and **violence organization** military industry complex with CIA.

However he did a fatal mistake so called **climate change** due to massive oil consumption.

In 1980, his research laboratory noticed the fact and they insidiously decided to hide. However such big event could not hide by any means in the actuality. The problem is outrageously too terrific as **mankind extinction**, as for which once again they had made a deadly decision to hide. As the consequence, insidious global **climate hiding operation** began to go on.

The terrific influence at now had referred to mass media, education and research institutions, and the business and political-administration societies in **every fields the world wide**.

In fact, **effective climate mending** needs **global regime conversion** from business as usual.

Revolution is more terrible than defeating war. This is nothing, but **mad rulers mind** at now.

We recognize highest priority of climate change and make emergent effective countermeasure for it by leading the tactics with global cooperation. In climate mending, reduction of carbon fuel=**massive transition to new energy,saving food production & distribution**,and **emergent geo-engineering implementation** are necessary.It's necessary to establish **climate war time regime** as cooperating battle line between public and non-public by global man power calling ,by R&D in **planed economy** and the implementation by agreement between government and NGO.

Disclosing planed economy and the implementation by agreement between public and non-public is inevitable. We shall call for establishing R&D institution on **planed economy** (econometric method) and make **emergent structural change of economy regime**.
