

### —The First Problem of the World is America—

As for many nations, above all, the influence of USA may be the most. Because many ways of modern life was made in USA. By the wealth, technology, political & military power, USA dominated this world, as is called USA imperialism. However even such they have come to a singular era of encountering unprecedented financial and living resources difficulty, which has been warned for long time.

Then possible options is two, the one is becoming more competitive nation with hates, the other is becoming more cooperative nation with generousities.

#### ① Real Essential Difficulties of past and now the World :

- ① The conclusion is always two logical exclusive, such as 1 or 0, light or dark.
- ② As for mankind, their possible option for others is also always **give** or **take**.  
The former is basic behaviour of **adult parents**, the latter is that of **children**.
- ③ Give, take relation is universal being in any stage of living organization.
- ④ After all, the supreme problem of human relation is depend on **satisfaction** in giving and taking, or **producing** and **consuming**. What happen if without satisfaction ?, It is conservative culture stagnation that is stable and right.
- ⑤ Then retrospecting human history, their main concern was always how much taking from others (or land and sea). Rather sophisticated system was called kingdom in which king the winner occupy all the thing by means of wars and dictatorship. Now kings are changed their fashion and called **capitalists and beurocrats**.
- ⑥ The supremely developed nation on giving, taking, producing, consuming with utilizing possible large scale technology was build as USA. After world war the 2nd, many nations people taked in copies of USA way of life. However their fail was such **excess adaptability**. It would be fatal, because excess producing & consuming had come to poin to break down the fundamentl living resouce fields, or in other words, hazardaous global climante change.
- ⑦ Author knows also fundamentalists who believe in God, reject modern culture and live in traditional, old fashioned way of life without even electric power. It may be entirely ridiculous for many people. However they are right in a sense.
- ⑧ It may be also not less who think of moderately way of consuming life. Then why USA had grown up to be gigantic?. It is caused from minor family the nobility, monopoly autocrat **who fear decline of their high status by peoples hates**.  
Then they had to give peoples much goods by accerating competitive commercial capitalism and peoples vanity in order to avoid peoples hates against them.

⑨ **God vs Satan<the kernel problem of human being history> :**

God ordered angels to kneel down before Adam, then all of them did so, but, only Satan rejected. Then God asked Satan, why did not so?. Satan replied, "I am higher than him, because you made me from fire, but he was made from clay". Consequently, God angry and ordered him thrown down to earth from heaven. Thanks to God, I had been in terrible maze, so I will revenge him by ambush attacking on people who are in straight road to God from side of left, right, front and behind. Thus they would lose thanks and believe on God.

-Al' Quran chap 7, P204 (interpreted in English by author) from Japanese edition, by original translator Toshihiko-Izutsu, Iwanami bookstore, 1957, Tokyo-

**The essential tragedy of human being and also the key to liberate human being are all concentrated in this one paragraph. Yes, people must be equal !.** Reader should study this taught carefully. Then all the mysteries could be solved clearly. Author heard that the original was in supplementary story of the bible.

⑩ **Rich USA had to take from other nations (problems of strategy imperialism) :**

- (1) 20% USA people is said to be poor, though USA is the richest nation than any other nations. Why so rich?. They take money and resources from other nations.
- (2) For example, about 20 years ago, Mr Baker Secretary of the State said to Japan. Income structure should be top heavy one, and then, it had become realized as that 75% of national income is pocketed by few of 1/4 people, and also even 1/3 employment is temporary without decent social welfare. Thus now radical income gap had grown and social stability had been lost. Then where the enormous surplus money to go?, yes abroad, especially investment for USA.
- (3) Japan is pseudo democrat nation with invisible fascism operated by **CIA** since end of the war. The long range dictatorship of LDP (liberal democratic party) has been closely connected to the power of USA for supporting the imperialism.
- (4) Japan's appeared prosperity hides collapse of their essential nation function. Food self supply becomes 40%, and above all, self dependent and mutual-trusting mind had been lost in recent years by large scale conspiracies by CIA.
- (5) These situation might be seen in so called satellite nations of USA.
- (6) To tell the fact, it is USA who is the Satan nation. Almost USA citizens know nothing these deepest sins of USA.

① **NAZIS-SIALIZERD USA (fascism invisible).**

(1) **The large scale deceiving mechanism against people in USA.**

Conclusionary to tell the kernel of cancer disease of USA has been in **dominating network invisible** operated by certain intensions of the power center (which is also seen in Japan). For amateur people, author recomand the movie "JFK" by Oliver Stone. This movie well disclosed realities of the fascism operated by CIA, military-industry complex, police, judiciary beurocrats in order to conceal the secret of Kennedy's assassin. Then you notice the common keyword is "those who live by eating taxes!". None governmental people are mere their maids and servants. What in the world, **who pay tax**?. Tax payers are disrespected by them. Thus you see a kernel is also giving and taking on tax.

A **beurocrats** is too arrogance due to his nothing bankruptcy, a **capitalists** is too cautious on possibility of his decline. If they connect with each other, what...? As for beurocrat-capitalist=**kings** is the worst hazadous for people.

(2) After all, what is politics?, it is competition on **tax money** with guard of national lows. This affair is quite analougous in USA and Japan.

(3) Here is threatening, old fasioned phylosophy disclosed by brave Americans.

"Fleshing out skull & bonds by K. Millegan and A. Sutton" disclosed, in relating with Bush family, kernel secret of the origin of USA fascism imported from so called Illuminaty in Germany to USA. They are secret society for dominating USA and the world. They deeply concerned **establishing CIA** in operation paper clipp which imported many NAZIS. Their phylosophy is due to dictatorship in Preucen and consider people and nation for exploiting for nobility autocrat the eugenic principle. In additon to tell, Bush family is kinship with British king. Therefore Bush and Blayer deeply cooperated in 9/11 than any others.

(4) **9/11 was the final stage of trying recovery of the ultra-rightism in USA.**

For long time, the military-industry complex (MIC) had been disrespected in Klinton disarmament policy. In his boyhood, he encountered Kennedy and was influenced his phylosophy (liberalism, east-west detant with disarmant). Thus both of them were teribbly hated by MIC-etc. Consequently in the most doubtful election in USA, Bush the marionet of MIC-etc of urtra-rightist groupe became president for recovering their power. His first work was the big order to Lockheed. Then that 9/11 was conspired and executed by Bush's secret groupe in order to make war against middle east and invade the oil land. (domestic oil resource in USA said to be starved before long). The dramatic attack was

executed by remote controlled airplanes(embedded device called "Homerun") and timer bombs embedded in the buildings. Thus innocent muslim had been made up as radical criminal, against whom, American had become severely hated. Thus the most unprecedented unreasonable wars in human history had been made against muslim nations. In the later, many doubtful evidences has been in succession pointed out on 9/11. In recent USA, most of people are said not to trust on government report on 9/11.

(5)In order to make own benefit chance, they make own crisis as conspiracy.

Certainly such attacking own nation is far beyond normal commonsense, however, as the consequence, gigantic deceiving becomes possible. Actually American business school has such lecture(Friendly fascism, by Bertram Gross). Such conspiracy already had actually executed in Japan as Oumu-sinrikyou case (religious kartell in 1995), in which police spy had been inspecting their secret activities for long time. Therefore the unprecedented crime(poison spreading in crowded subway)was executed just before police inspecting. Since then, this ultra-anti moral crime had entirely changed property of Japanese crime from that of past. Consequently people's voice for strengthen police power was formed. 2008 in USA, the subprime loan crisis has become very serious. As for Japan, they had precedently experienced similar case in long recession 1990~2001 by gigantic failure in excess investment on real-estate. Japan might be a nation for various experiments field.

⑫**Poverty in prosperity or a prosperity in poverty:**

(1)Now back to the problem on ④="what is satisfaction?". The conclusion may lies in "equality". For example, there is a town with enclosed high wall where only rich are inhabitants, one of who said that worth in this town becomes comparing level of material life, or vanity competition(2006?, TV-NHK, Tokyo). That is, a satisfaction is rather relativistic, not absolute.

(2)**(Pride & vanity?) in (rich & poverty):**

A people fear for others considering his poverty is caused by incompetence. Especially high status people are bitterly cautious for his status decline. Therefore the solution is evident that people must be equal.

(3)**Hereditary as anti-democracy:**

For accomplishing most benefit for organization, the leader must be elected by evaluating only his ability. This is the fundamental principle of democracy.

## ② Overcoming the Difficulties by Peoples Unite with Truthes & Generosities.

A **truth** was a realization or shall be a realizability. They are recognizable by scientific way, or religious prophecies. The former is applicable for material domain problem, and the latter is for human (mind) domain problem.

The supreme conclusion in the latter may be "**people must be equal in God!**".

As the consequence, people must co-live with together !!.

① **The established science is up side down.** The worst typical example is **religion**.

People are made up to believe science fact contradict with religious fact.

(1) Most frontier mathematical physics had made it evident that a physical vacuum

(PV) world is not mere an empty, on the contrary, **the world is everything at all !!.**

(2) **The most large number of natural number set and the mystery of real number  $0^*$ .**

You can never tell the most large natural number  $\{0, 1, 2, 3, \dots, M\}$  definitely.

If you say  $M$  is the largest, then  $(M+1)$ ? Yes, it is so called infinity  $=\infty$ . Now

you imagine  $x=1/M$ , where  $M$  is the largest number. It may should be zero  $0^*=0$ .

However, such  $M$  is indefinite, so that real number  $=0^*$  also must be indefinite!

Therefore, you never can simply tell nothing as for  $0^*$  which is indefinite!!.

(3)  $0^*=+a-a$ , where  $a$  is arbitrary number. Actually PV is observed as  $\pm$  symmetry.

(4) **PV world is logically contradictory**

**and then everything becomes simultaneously possible.**

(a) proposition A : [if presupposition P, then result Q is realized].

(b) proposition not A: [if presupposition P, then result not Q is realized].

(c) contradiction A and (not A):

[if presupposition P, then result Q and (not Q) is simultaneously realized].

☞: In material world, you never can see simultaneous realization of Q and not Q.

Although, in VP world, simultaneous realization of Q and (not Q) is realizable

due to similar way of  $0^*=+a-a$ . It's **world wide official recognition** that in

vacuum, a creation from nothing is possible as way of  $(0^*=+a-a)$  in short

time interval. It's a breakdown of causality law (realization of contradiction).

It is called **vacuum polarization phenomena** in elementary particle physics.

(5) A realization of **contradiction enable everything=allmighty!!!**. (Logic Theorem)

(6) The being of **spiritual** in the other world is true. Because VP world is composed of arbitrary matter  $M^+$  and anti-matter  $M^-$  by pair (dipole) which can be alive.

Paranormal phenomena is true, such as **prophecy** by person paranormal ability.

(7) You may feel something extraordinary. If possible, author wish to write more details in other paper,

## ② Human-being as incomplete one:

(1) Conclusionary telling, human being knowledge is always incomplete, but allmighty being is not.

The merciful they has been observing human history from the other world. Then situation becomes so serious, they send missionary to the earth. It's the origin of religion which give us the supreme knowledges guiding us better way. Yes, that is so called relief. However arrogance human being will not understand their true essence. A truth is sometimes up side down, an animal never need religion because they are naturally blessed being (they never kill each other in their groupe), but only human being is entirely not. Therefore "religion" has become necessary.

Hey you, look on the earth from heaven, human being is only to fight with each other for occupying. It never fail to seem **very ugly for observer !**.

## ③ Why such being as God had created Satan ?.

For being light, also dark must be, for being happiness, also unhappiness must be. If nothing negation being, the affirmative being become impossible. It is so called **exclusive logic**. The being of Satan may be a trial to be overcome for human being. Maybe God's most agony is the problem, so God had sent missionary with the prophecy. Thus we human being is tested to be worthy to live. Therefore we must make possible efforts to prove being worthy to live.

## ④ A blessed people are all religious one.

In Japan, they say that most happy nation people is Italian. It may need verification to ask themselves. Bari island people is heard to be happy by their way of life with art talent, who live in very religious way of life with dairy prey for their ancestor.

In other saying, those nation where religion is not genuine, suppressive, exclusive seems being tend to become hell. However, it simply can not be said that being church dose not simply means really religious.

☞: Author now does not relate with any specified religious organizations. He only reports very highly reliable matters (≠ fact) derived from theoretical-experimental physics (but not officially published by the authorities) and from general informations distributed in the world.

⑤ How to Accomplish people's equality ?. <Strike out the satan phylosophy !!!>

(1)Democray principle :

For accomplishing most benefit for all the people of organinzation, possible best electing the leader must be wider equall opportunity by evaluating only his ability of leadership, but not by any other factors. This is the fundamentl and pragmatlcal principle of democracy. This agrees with also God's order.

They say today's world has become democracy by abolishing kingdom dictator.

However a hereditary is extremely stubborn and has been survive even today.

The typical exmample is the imperial of UK, Japan, etc. In such nations, their dominating class is stubborn hereditary one who are extremely cautious on their status decline, so their main concern is only egoistic defence on their status.

All the threatening for people by evil rightism activity has been caused from them(The 9/11 is the worst terro by them in the world history, Bush connects with UK imperial). Marx proposed unite of international labourer, but actuall unite is that of the hereditary class. Each nations people are divided by their own local egoism under circumstance of certain well made intensions. Because a world wide established mass media(newspaper, TV) is a sort of intentional(conspiracy). However as so, there are also minor, but sound anti-established news sorces.

VS

(2)Thoes who causious for their high status decline is to unite secretly.

So called **secret society** such as skull & bonds, freemason are all due to above reasons. There are testimonies that they conspired revolutions and even world wars for establishing their hegemony.

(3)A conservative politics belongs to such hereditary groupes or establishments.

(4)**Satan phylosophy**:They consider themself eugenic(=nobility) to do dominate.

Humannbeing is devided to those who are dominated and who do dominate.

This is nothing without representing **discriminating ideology** !.

Summary and simply to tell, we are to be inferior to them !. In the below, we shall show that we can do better way!.

(5)**Democracy principle is far sperior to hereditary**:

This is evident that we can elect leader from the overwhelming major groupe by **their actuall ability**. On the other hand, hereditary is extremely minor groupe.

(6)Why they are good for nothing is, above all, **their petty egocentrisism**,

which had made this world hell such as wars, and global thermalized crisis.

### ③ Already we had won the victory called the supreme truths.

After all, only correct ideology(it is simply truths)can create genuine world,  
on the other hand, that of Satan (being against God) is up side down.

#### ① God make this universe from nothing (=o\*) <Al, Quaran>:

(1) Because, nothing world is allmighty one <see ②①(5)>.

The nothing world is out of scientific law (out of causality),  
or nothing restriction of physics law, hence everything become possible.

It's difficult to give full detail on this paper. After all, a basis of science  
had completed as so called **Symbolic Logic** (basis law of comprehension) and  
**Quantum Physics** (supreme knowledge on matter & vacuum). The creation process of  
universe was described Quantum Gravitational Dynamics as standard theory (1995).  
In 1993, Super conducting super collider in Texas was aborted by the discovery.  
However the mystery of life creation process has not yet be interpreted by  
science. It maybe the supreme miracle art of God. A life is miracle, because, it  
may be extremely rare, but there's record of human who lived only with water<sup>(21)</sup>.

(2) The being of **spiritual** in the other world is true <see ②①(6)>.

As the consequence, our life is not only this world, but also in the other one.  
Therefore we should pray for our ancestors with thanks.

(3) Now world is dominated by **atheism**, but they are defeated !. Then note that there  
are many misled religion groups on the earth, who now conspire with Satan.

#### ② That people must be equal is God's order <Al, Quaran>:

(1) The story ①⑨ teaches everything at all.

(2) As was mentioned in ②⑤, this agrees with pragmatical view point.

(3) The realization of people's equality is to **live together**.

#### ③ The problem of overcoming evil inheritances of Satan:

(1) Then we should know that they (Satan) may had known own destiny (by his prophet)  
and had setted suicide timer bomb called the global thermalized crisis.

The most difficulty is little time and little advertisement on the problem.

(2) **Now their foolish servants eagerly wish to conceal the facts. Knowing the fact**  
is minimum condition for establishing to live together mentioned in above.

(3) **Therefore nothing is more necessary than**  
**world wide unite of people with the truths.**

**A1:As for a Network Dynamics Method for Economics for Living with Together:**

The last main theme is introducing an economics for realizing above phylosophy.

People can be fundamentally free to live if they ensure **foods, energy and housing**.

Ofcourse the triple goods is not sufficient for greedy modern life, but it will ensure minimum living needs. This had already become serious in the world.

(1)The essential need for economics is **to estimate demand and adjust supply** in total system with minimum cost and with stable state.

(2)So grasping total economic dynamics(time dependent economics)is necessary.

(3)Author had developed the dynamics by variables mappinng method as for AB.

AB(account book) is detailed data collection on dealing goods with money flow.

After all, social sum of AB is complete one to one mapping between real economy.

(a)account book :

Dealer number	Income=price(t) × quantity(t)	Outcome <t≡financial year>.
1	$S_{j1}(t) = p_{j1}(t) \times N_{j1}(t)$	$S_{1j} = p_{1j} \times N_{1j_0}$
2	$S_{j1} = p_{j2} \times N_{j2_0}$	$S_{2j} = p_{2j} \times N_{2j_0}$
:		
<b>j</b> (own)	$S_{jj}(t)$ <surplus>	<b>financial term</b>
:		
k	$S_{jk} = p_{jk} \times N_{jk_0}$ (money flow $j \leftarrow k$ )	$S_{kj} = p_{kj} \times N_{kj_0}$ ( $k \leftarrow j$ )
:		
N	$S_{jN} = p_{jN} \times N_{jN_0}$	$S_{Nj} = p_{Nj} \times N_{Nj_0}$
		$I_j(t) \equiv$ possible payment $= \sum_{k \neq j=1}^N \omega_{jk} I_k + (d/dt) [D_j - \omega_{jj} I_j]$

(b)elementary process of commercial dealing :

(c)**economics network :**

All the dealer is numbered as {1, 2, ..., N}.

Any of between the two forms above (b).

(4)The mapping fundamentally yield simultaneous equations for dealing variables.

(a)  $(d/dt) [\omega_{jj}(t) I_j - D_j(t)] = \sum_{k=1}^N \omega_{jk}(t) I_k(t) - \sum_{k=1}^N \omega_{kj}(t) I_j(t)$ . <sales account EQN>.

<surplus-debt>year increasing=sales sum-payment sum.

(b)  $S_{jk} = p_{jk}(t) \times N_{jk}(t) = \omega_{jk}(t) I_k(t)$ . <market balance equation>

<j←k sales>=price×quantity=<j←k pay probability>×<k possible payment>

\*There are another equations for becoming complete simultaneous equation system.

(5)Summary to tell, such faithful mapping become possible **without any ideology**.

(6)The theory is now not complete, however, the mapping method may be most strict.

(7)By employing larger AB, the number of variables must be reduced to calculate.

(8)From (a), serious **financial theorem** is derived on debt and current asset.

**[Total sum of accumulated debt=Total sum of accumulated current asset].**

(9)In Recent years **FRB** has been printing almost explosively **\$s**, so the radical inflation has evoked in **basic living resources markets, oil, wheat, corn, etc** in order to relax financial crisis due to such subprime loans, etc. FRB is now trying to gather all the debts in USA into ownself for terminating the crisis.

(10)As for global economics view point, international industrialization tends to be excess, on the other hand, basic living resource supply tend to be insufficient due to demand growing and resource recession. The latter is now partly due to global climate change. Before long, the tendency will steadily grow.

(a)Therefore, it is entirely ridiculous to seek such as international vanity competition, which has been stimulated by the prosperity show window of USA. On the contrary, any nation should seek self-producing fundamental living resources, especially food, water, and clean energy supply.

(b)After all, IPCC reports tell almost noncommittal attitude, so many nation take footloose policy. As the consequence, nothing relief is to be accomplished.

(c)From current situation routes view, the catastrophe will never be evaded. The final answer is necessity of **the global agreement on energy supply of officilized control for each nation**. If not so, ridiculous global economic competition will destroy ownself. For the aim, "**decent phylosophy and decent caluculatable economics**" will be necessary.

#### -REFERENCE LIST-

(1)鈴木基司, 経済回路網力学, 時事問題解析工房, 1998, 神奈川.

**A2:Introduction to the basic law of comprehension≡Logic:**

The kernel problem is **contradiction** which enable everything possible.  
A way of logical comprehension is more indispensable than anything.

**①A contradiction never happen in our material world with finite probability.**

☞:but it can happen with the zero(that miracle real number 0\*) probability>.

(1)Typical example :

A merchant say "this spear can break through any shields,and this shield can block any spears".Then a passerby asked the merchant" If you try to break thorough the shield with the spear ,what will happen ?",.....。

(2)In actual our physical material world,it never be possible to realize {A(breaking thorough the shield) and **not A**(not breaking thorough the shield)} simultaneously.As the consequence,our material world phenomena is basically non-contradictional.They happen mainly in our languages(**lie** as software).  
☞:Non-contradiction is an essence and a mathematics system can be created from unique and only the presupposition of non-contradictioness.Because,if cause A,then result B is unique,it becomes something functional  $B=f(A)$ .  
By assigning numbers set A yields unique value B is called **function**.  
This is the fundamental reason why material science is described by math.

(3)A contradiction is to break down something orderly.Telling lie cause loss of others,An error causes breaking down some order in our material world.

**②If a contradiction had happened,then what would cause ?.**

In the below paragraph is a convenience for comprehension for amateur readers.  
The detail should be consulted with appropriate texts on **symbolic logic**.

- (1)If happened,it is in non-material world=**physical vacume world**.
- (2)Set is defined as collective of elements each of which satisfy member's property.Proposition A is concerned with definition of the property.
- (3)**a simultaneous realization of A and (not A) is everything.**

(4)In this way,a contradiction enable everything,It becomes allmighty !!.

③ **The Completeness Theorem ( $\equiv$ CT) :**

(1) A proof is a procedure to verify truth of proposition "if A, then result B" such as "A  $\equiv$  N is natural number, and N+1 is too, then B  $\equiv$  the maximum one never be determined definitely". Coarsely, CT could be mentioned as **a true is provable**.

(a) From the latest view, a true is realization as repeatable observable phenomena with finite probability ( $1 \geq p > 0$ ). Repeatable observability is realization with finite probability, so true must be verified by anyone. Such being is called **taughtology** ( $\equiv$  invalid true, evident true). Yes, a logic states only taughtology.

(b) **Proof** is definite procedure of **deductive inference** such as "presupposing A concludes result B in evident way for which none can object". Such inference  $A \subset B$  is also called taughtology.  $A=B, B=C$ , then  $A=C$  is taughtological inference.

(2) **The simple proof of CT="A true is provable". <for vigorous students>.**

(a) **Proposition** is defined as judgemental statement with determinability of the true=1 or false=0. Such proposition is called **complete**. Certainly there are also statement without determinability. Such proposition is defined as **incomplete** one.  $A \equiv$  "Stock price in tomorrow will increase" is incomplete.

**predicative logic** : subject (noun=n) + predicative (P), cow(c) eat (E) glass(g)  $\equiv$  Ecg.

**propositional logic**:  $A \equiv$  Ecg,  $B \equiv$  Edm (dog eat meat);  $A \vee B \equiv$  A or B,  $A \wedge B \equiv$  A and B,

(b) **Proof** is a definite symbol sequence as  $\{A=1, (A \subset B) \equiv 1, \Rightarrow B=1\}$ .

(c)  $(A \subset B) =$

A	B	$A \subset B$
1	1	1
1	0	0
0	1	1
0	0	1

$A \subset B$  is called **conditional** and is kernel axisom of logic. The meaning is "If presupposition A, then conclusion is B". The left table is the truth value one. Then note that conditional is **"deductive inference"** and always true when presupposition is false. **(0, 1, 1)** means that inference is true when result B is true, then false presupposition is don't care. **(0, 0, 1)** means both cause and result are false, the inference is true. **Consequently with false presupposition (=contradiction), any inference becomes true.**

(d)  $(A \subset B) = \neg (A \wedge \neg B) = \neg A \vee B$ , where  $\neg$  is negation(not),  $\wedge$  =and,  $\vee$  =or.

(e) For being invarid result  $B \equiv 1$  (taughtological) when presuppositin  $A=1$ , B must be  $B=A \vee R$ , where R is certain proposition.

Then the inference become  $(A \subset B) = \neg A \vee B = \neg A \vee (A \vee R) \equiv 1$ .

Thus the inference is found to be taughtolgy (invalid true). <proof end>.

(f) **A predicative logic can become propositional logic in general.**

There are two kind of noun such as **individual** one and **collective** one.

individual: sun, europe, Adam, Eva, a, 1, ...

collective: animal, natural number, Egyptian, .....

As for the statement on collective noun  $x \equiv \{x_1, x_2, x_3, \dots\} \equiv \text{set}$ ,

so called quantifier  $\{\forall, \exists\}$  is necessary.

\* $\forall$  (universal quantifier)  $\equiv$  all of x, arbitrary x.

\* $\exists$  (existential quantifier)  $\equiv$  certain of x,

Then following equation can be established in general.

$\forall xPx = (x_1Px_1) \wedge (x_2Px_2) \wedge \dots = A_1 \wedge A_2 \wedge \dots$ ;

$\exists xPx = (x_1Px_1) \vee (x_2Px_2) \vee \dots = A_1 \vee A_2 \wedge \dots$

In the above way, so called **predicated logic** becomes simple **propositional one** with condition of each terms definiteness of the truth value.

☞: **As for discrete countability of infinitive set.**

Established mathematician object non countability of real number set.

However real number never be finite due to definiteness of real number zero  $0^*$ .

④ **The simple proof of IT = "There must be incomplete proposition of which true or false never be determined in non contradictory Theory".**

proof: you never can determine the most large number in Natural Number Theory.

☞: **The most important matter is IT belongs to statistical phenomena in general.**

☞: Note that the real number  $0^*$  should be called the miracle number.

**Then the probability  $0^*$  is to mean not nothing !!.**

⑤ **As for Kurt Goedel (1906~1978):**

Both CT(1930) & IT(1931) had been proved by Goedel, born in Chekoslovakia as Germanish, but not Jewish. However he was obliged to refuge to USA in NAZIS era. His work was a monumental landmark such that (a true is provable) ensures completeness of science basis, so he could not help to encounter enemy in philosophy. Then he proved the incompleteness theorem, which curiously had become more interested than completeness one in established world of speech and writing. They made rumor that there is something that never be grasped by science. But it had been found statistical phenomena recently. Consequently a science becomes necessary and sufficient with both causaitical and statistical. Well, CT & IT era was the world economic panic and then now is also uncertain. He died by fasting possibly as a resistance for unreaoable treatment by medical. A logician and doctors may have been bad terms since then.

**A3: Introduction to Electric Power Generator of Nothing CO2 Emission:**

Here is the marvelous technology, by Nicola Tesla (1856~1943) the modern alternate current generator inventor, which generate electric power from such as nothing. Certainly it's ridiculous from the former view point of **energy conservation law**. To tell from the very beginning, universe was created from nothing in such way as  $0 = +E - E$ , where  $+E$  is positive material energy, while  $-E$  is negative one of gravity field. Both of them are accurately cancelled with each other. This fact is officially recognized as standard physics. However the great invention had been historically hidden by the authority and oil industry in USA at that time.

Now author introduce you **B wave generator** as Quantum Electro-Dynamics (QED) as standard physics. For the pragmatism realization, so called **ferror dielectric material** of good performances with low cost is necessary.

**① For amateur readers (elementary electricity view point) :**

(1) **Electric charge and Coulomb law :**

In general, matter is composed of positive charge and negative one such as  $\{e^+$  and  $e^-\}$ . They tend to be attractive between opposite signs, and repulsive between same signs. **Between two charge particles, there generates remote force.**

(2) **Electric field intensity E :**

Charge yields electric field intensity **E** around it. It is called static electric force observed in friction between two insulators. Electric field intensity **E** is defined as force on charge as  $\vec{f} = q\vec{E}$ , where **f** is quantity with the direction (**vector**). Hence **E** induces charge movements as the dynamics.

(3) **voltage V** is work (energy) taken in moving unit charge place A to place B in electric field intensity.

(4) **work (energy)** in dynamics is defined as product of against force (**f · r**) × distance of displacement, which can be recognizable by muscle of arms in daily life (work).

(4) **current**  $I = Q/t$  is charge amount passing through cross section  $S$  in unit time.

(5) **electrical power flow P** with  $V$  and  $I$  in unit time :

$$P = V I$$

Charge  $I$  passes across voltage  $V$ , so the work in **unit time** is  $V I$ .

## ② Circuits element and the energy view point.

(1) **resistor R**: alternate current generator (AC) with light bulb (=resistor  $R$ ).

$$V = I R.$$

<voltage=current  $\times$  resistor>

$$P = V I = I^2 R = V^2 / R. \quad \text{<power/sec : } P = V \times I \text{ >}$$

**Resistor consumes electrical power** by  $P$  as lightning energy, and heat one.

Then  $V, I$  are alternating in a cycle with the same **phase**. Then always  $P = V I > 0$ .

$T$  is time interval of one cycle of alternating.

Then the correspondence  $T \Leftrightarrow 2\pi$  is called phase in such way as  $T/2 \Leftrightarrow \pi$ .

(2) **inductor L** :

**Inductor consumes nothing in a cycle** with creating & annihilating magnetic field  $H$  energy. In  $T_1$  cycle, it absorbs positive energy from generator (for inducing magnetic energy in field), while in  $T_2$  it outputs positive one (magnetic field return energy to generator). Also note that in  $T_1$  cycle,  $V I > 0$ , while in  $T_2$  cycle,  $V I < 0$ , each of which are cancelled with each other. The magnetic energy is created and annihilated around the coils' neighbour space in a cycle.

(3) **radiation from dipole antenna** (transversal electro-magnetic wave radiation).

Two rods are antenna on which voltage and current are distributed as the figure. Then  $P = V I > 0$ , so, dipole antenna consumes power  $P$  same as  $R$ . The energy is converted so called transversal electro-magnetic wave radiation into space.

Transversal wave is one, of which amplitude oscillating directs perpendicular to the propagation direction  $P$ . It is the same as wave on water surface.

(4) **What is magnetic field, electric current and electro-magnetic (EM) wave?**

**<Transversal wave as A wave>.**

It, s collective of spin currents such as .

It's like tops arrangement.

In the other hand, current is created by surfacial collective of spin currents.

Now each spin current is supposed to have same intensity.

Then not that adjacent currents are cancelled with each other due to their opposite directions. Hence only the outer side currents are to be survived.

A transversal wave stimulated by alternate currents is propagation of such spin arrangements. Therefore transversal one is essentially magnetic wave.

Thus vacume field (in which EM wave can propagate) is not mere empty, but is collective of spin currents with electron= $e^-$  and anti-electron=positron= $e^+$  pair ( $0 = e^- + e^+$ ). Nothing EM field is collective of random orienting spin currents with their cancellaton on the intensities.

(5) **capacitor C** : A capacitor is two opposite conductor surface within insulator.

Even without conductor, there can be current by inducing electric polarization. In insulator, there is spontaneous charge separation (electric polarizations=dipole-nization)

such as  due to so called internal molecule bonding quantum force. Then  $E$  acts arrangement of dipoles orientation along  $E$ , which veiled so called displacement current.

(a) without  $\mathbf{E}$  (random orientation).

(b) with  $\mathbf{E}$  (arranged orientation).

(c) Displacement current is proportional to change speed of  $\mathbf{E}$ .

As has been mentioned in (2) inductor  $L$ ,  $P = V I = 0$  in a cycle.  $T_1 (V I > 0)$  is called **charging** phase while energy is reserved in capacitor, and  $T_2 (V I < 0)$  is that of **discharging** one while energy is return to generator. Thus you note that  $L$  and  $C$  is symmetric in their behaviour.  $C$  concerns with electric field  $\mathbf{E}$  energy. Capacitor acts as very short time battery. Then capacitance  $C$  is defined with reserved charge amount  $Q = C V$ , where  $V$  is voltage between two electrodes.

### ③ Radiation from mono-pole antenna (longitudinal charge density wave radiation).

This chapter is the main theme of appendix A3: Reader should carefully recognize its essence. Most utilized EM wave (**A wave**) such as portable phon is transversal one consuming energy for radiation, but there exists another mode called **longitudinal electro-potential wave,  $\phi$  wave, or charge density wave (B wave)** which seldom utilized in commercial. However it is quite reasonable in standard quantum electromagnetic theory (QED), but not complete in classical one. And also, it has remarkable features.

#### ① As for longitudinal wave:

Typical example is acoustic wave, which propagates as vibration of air volume density  $\rho$  directing toward the propagation of  $x$  axis.

② Monopole capacitor and the propagation of polarization domino:

(a) the situation:

G is earth of voltage=0. B is battery connecting to monopole antenna M through switch SW. M is a sphere of conducting surface. Making SW on causes M equi-voltage of B by flowing charge (current) on M.

The collective charge is to induce polarization around M. Then  $\rightarrow$  means forming dipole ( $- \sim +$ ). Then outer side of  $\rightarrow$  also are induced as  $\rightarrow$ . Thus this induction is to propagate toward outer side of M. This is longitudinal electro potential wave or charge density one or B wave.

In above situation, only the positive charge density of propagation head surface is to propagate with decreasing its intensity as propagate goes on, and following wave are nothing. Therefore accomplishing stationary propagation, DC battery should be exchange to ac generator. B wave has nothing magnetic one.

(b) The propagation is described by QED (and also in classical one (CED)).

③ Monopole antenna M is capacitor consuming nothing energy and also the radiated B wave becomes so to say "a flying ac battery with positive energy".

(1) As was mentioned in ②(a), the propagation head surface is charge density  $\rho$ , which has positive definite field energy density  $\rho \phi > 0$ , where  $\phi$  is the voltage (measured from the earth  $V=0$ ) formed by the charge density  $\rho$  themselves.

(2) As the consequence, B wave becomes a flying ac battery with positive energy.

Thus the charge density on the receiver electrode ( $A_R$ ) is to generate voltage  $V=\phi$  between the ground  $V=0$ .

That is, attachment of flying ac battery on  $A_R$ .

The voltage can generate power to heat up resistor R.

This fact was verified by experiments by author himself.

☞: Note that the measurement must be sufficient distance between M and  $A_R$  of so called "in wavenized distance", but not "in static one".

(3) From where the energy come ?!. It comes from the biggest hearted Gravity Bank !.

$E=mc^2$  is the famous Einstein's formula on energy and mass. The mass generates gravity field with the negative field energy  $-E$  cancelling  $+E$  in the universe.

By unifying general gauge field theory (R. Utiyama, 1956) and the quantization one (L. D. Faddeev-V. N. Popov, 1967) had established quantum gravitational field theory (1995), which (QGD) is to disclose the details. Because a EM field is mere a derivative of QGD field.

#### ④Warning for the safety:

B wave never should be radiated in electrically non-shielded space. Because,

(1)A monopole(charge density wave) radiation never can be terminated in view point of **charge conservation law**. It breaks down the law.

☞:A highly condensed mono-charge density has possibility of becoming bomb. Also author consider so called **artificial earthquake weapon** is B wave. These facts must be officially disclosed in opened international stage.

(2)**The holly vaccume world** must be nothing contamination with B wave, which is also called dipole ghost.

(3)For accomplishing above mentioned **safety requirements**, so called **double balanced earthing method with spontaneous  $\pm$ leakage field cancellation in shielded system** is absolutely necessary.

The details will be mentioned in later.

#### A4: The Gigantic Deceiving People

by the Established World Wide Mass-Communications.

or How to Accomplish Peoples United Action with the Truthes.

It is not that people do not know facts, but that they know rather well of them, still they accomplish nothing remarkable good results.

Even though they live in the situation becoming worse, they do nothing, Why not?.

(1) Then "feeling too much difficulty" make people tend not to do anything !.

(2) "Feeling too much that most of others do also nothing" make people tend not to do anything !.

(3) Therefore, above all, answer for how to make them "ease" is necessary.

① Low of game: There would be nothing defeat even in one hundred battle, if we had accomplished to know "enemy and ownself"... Sun tzu.

(1) {Rock, paper, scissors} is well known game and has all of the features of game. To win or defeat is entirely depends on probababilical selcting tactics. If one could estimate better probability of enemie's tactics, win become more possible. Therefore reducing loss of information is decisive. Thus we must endeavor to survey informations on enemy and ownself thoroughly. Enemy also do so !.

(2) Estimating enemy's response: <All is changing as time goes on>

Executing our tactics never fail to cause enemy's response, which might be harmful. Thus sequential estimating on progress of battle is necessary.

Above all, to guess enemy's mind thoroughly is also extremely important.

(3) Fail is frequently due to wrong estimation for ownself:

(4) People can be grown to be tough by trainings.

(5)(6)(7)

② How to make large scale deceptive against people <the general principles>.

(1) Making upside down in commonsense.

"In conspiracycal world, everything becomes upside down"... Allen Daress.

☞: caution that upside down of upside down is not upside down.

(2) "Feeling too much difficulty" make people tend not to do anything !.

(a) Therefore, they do make extraordinary abnormal happening in order to make people' mind confusional and desperate such as 9/11. In other words, It's enemy's very wish, and is being caught in their trap.

(b) **Desensitizing treatment method:**

At first, information is to be leaked to minor people, who becomes state mentioned in (a). This situation is gradually to propagate, which makes the situation (3). This is called desensitizing treatment in allergy ill.

(3) **"Feeling too much that most of others do also nothing" make people tend not to do anything !?.**

(a) People generally tend to be influenced or to accord with movements of the major around them without verifying truths. Though, they are gradually to recognize whole truths.

(b) Then without mass-media propaganda, they are rather in difficult to recognize how many know so as whole. Thus you know the real role of mass media now.

☞: Today, people are to have many same informations simultaneously by mass media. It is so to say **gigantic common recognitions on the world**, which activate them and society. **Thus people's relying on mass media might make them their marionets**. What in the world, who pay their incomes!

☞: Therefore, above all, answer for how to make them "ease" is necessary.

(c) Divide and rule people is their basic strategy, so people never be alone. Above all, to make reliable friends as many as possible is the best.

Trusting friends is more precious than guarding oneself against betray.

(4) Enemy will attack on our weakpoints thoroughly.

☞: Everyone has own peculiar weakpoints, so self-recognition is necessary. egocentric, money, sex, health, beneficial & powered position in society, vanity, fame, jealousy, hatred, ignorance, secret, fear, anger, grief, drink & drug, poor, rich, ideology fighting, anything competitive, anything heavy in mind has danger for being utilized in conspiracy when it is known to enemy.

☞: Why such as this report is allowable to disclose ?, since there is nothing for them to take in from this report. They are evil specialists on these problems. In general, it is people who are not familiar with these problems.

(5) Example analysis <The problem of independence movement of Tibet from China>.

Now the independence movement of Tibet from China is activated at every nations in the world by foreigner Tibetians. A cause is reasonable hostility against Chinese monopoly in commerce, politics, culture in Tibet. Another may be bashing on upstart force as China by the established western world powers.

### ③ Special Caution on the Mass Media Informations :

#### (1) The principle//all the benefit for the establishments(nobility the hereditary).

As they have fear for decline, so they are eagerly to seek hegemony.

**The motives** make this world **heaven and hell simuletaneously**. For the purpose, world wide informations are controlled and manipulated by the certain center.

☞: **People are devided those who dominate and those who are dominated.**

#### (2) The Establishments(=ESTB=nobilities & monopoly capitalists the hereditary):

(a) Bush-imperial **UK-imperial Japan**, Europe and Asia nobility, Rockefeller, Morgan, Dupon, Melon, miritary & industry complex, sub groupes (USA), Rothschild, etc (Europe and Asia). Note on **USA-UK-Japan speciall connections**.

(b) **Their faithful servants: elites of each nations.**

mass media, capitalists, beurocrats, educational, police and miritary,

#### (3) **The World Counter Powers against(!) or cooperating(?) with ESTB:**

All the people of the world except their faithful servants(=elites of each nation !, ?) who are exploited by ESTB almost without consious.

(4) From above relation view, contemporary issues should be analyzed its reality.

(a) They never speak ill of their master the ESTB.

(b) They make fascismized conspiracy against counter power against ESTB. Hence, serious facts are often concealed. Thus people are caused being large scale deceptive. The most large and typical may be the case of 9/11,

(c) Most fundamental knowldges on natural science, technolgy and religeous facts are concealed. the being of God, creation of this universe, most basic law for comprehension, etc, especially history (criminal one of dominators) is the worst.

(d) Now world people is so to say a drug user dreaming heaven at steepest cliff.

In so called advanced nations, it had become quite dairy seen that in super markets, there be filled with too many goujeous goods. At hoeme, there be filled with too many energy consiuming goods. To get land for discarding wastes becomes steadily harder than get goods. People now seems becoming almost competitive vanity animal in their dressing, housing, and anyother. However their mentality seems far from true recognitions. They are so to say a naked king.

On the other hands, hungry people are seriously increasing and also neglected.

(e) The most emergent problem now is the global thermalized crisis and may be now the largest scale deceptive in the humann history.

## A5: The Legend of Great Prophets :

People has nothing means for **future prediction** except **theoretical estimation by scientific way** and **prediction by so called prophet**.

### ① Theoretical estimation by scientific way:

(1) **The completeness theorem**(see A2) :

A truth is a realization and truth is provable by logical way(**causality law**).

(2) **The incompleteness theorem**(see A2) :

Actual scientific proposition is almost incomplete(out of causality law), then almost predictions become probabilistical due to lack of certain informations.

It is impossible to make nothing of information loss in general. You never can tell tomorrow's stock price without uncertainty.

(3) **Empirical knowledges by specialists**<These are also incomplete>.

### ② Prediction by prophet.

In the past, people has been considering prediction by prophet is out of science. But it had been found to be entirely reasonable by quantum physics and logic.

(1) Vacuum world is the allmighty one(see A2). It is world of **spiritual being**.

They are allmighty being without physical law restriction. They know the all.

(2) If communication becomes possible between man on earth(prophet) and allmighty being, they can be prophet. Communication becomes possible with **B wave**(see:A3) of nothing energy consumption between their brains(hypothesis of **telepathy**).

(3) Animal brain activity is that of neuron which is also electro-chemical reactions with many charge particles radiating B wave in neuron cells.

(4) Telepathy has been known empirically especially between twin, or intimate family.

(5) Another possibility is so called **soul escaping from vivid body** to the vacuum world. Thus prophet become temporal allmighty being, then he reincarnate to ordinary world with precious informations. This case quite agrees with his testimony of Professor Jucelino Nobrega da Luz the famous Brazilian prophet.

(6) THE SLEEPING PROPHET EDGER CASEY(Jess Stern, 1966, Doubleday & Company Inc, USA) may be the case of (2), in which he made remarkable prediction as follows.

Through Russia, **hope of the world** has come. It is not such sort of communism, but is a fundamental principle of free to live for others.....p140(Japanese edition)

As for above statement, author could not help to remind two great Russianish persons, professor Jucelino who is Russianish Brazilian and teach us similar religious philosophy, and also the great inventor Nicola Tesla who was also Serbs(Russianish).
