

<the upside down world not noticing Arctic Crisis, but fighting false flag wars and false economy>

We can understand it, however we can not do it. Then answer may be **all going together at once !!!**.

Thereby, at first, we must establish something all we can get **confidence and consensus**.

(1) **Arctic Methane Catastrophe Crisis** in global warming caused by CO2 emission.

Massive methane clathrate reservoir lies in Arctic basin, which would become fatal thermal bomb causing rapid global temperature rise toward **fireball earth (the doomsday)!!!**.

<http://www.ameg.me/>

(2) **the 9/11 and false flag wars** operated by military industry USA (**operation ENDGAME**)

9/11 was outrageous own job terror to make wars in Muslim nations. Those are war business toward global hegemony by violence and hiding climate problem caused by EXXON-MOBIL **Oil and weapon merchants** are death ones.

<http://www.globalresearch.ca/911-the-mother-of-all-big-lies/5400986>

(3) **False economy hiding monopoly on wealth with huge sovereign debts.**

Total debts = Total Bonds is evident, so debt never be vanished without bond vanishing.

Now central banks has been printing money to finance **sovereign debts crisis** toward coming inflation in necessary goods in livelihood. **Market saturation** and **massive jobless** is co-body in recent years economy. Both are fatal defect of capitalism principle.

<http://contemporarybusinessideas.blogspot.jp/2011/10/10-defects-of-capitalism.html>

It is supremely curious that people will work substantially nothing for **climate countermeasure**. Unless drastic change, coming climate hell world would be outrageous than anything else, while people will not work !!!

Certainly there is decisive aspect that recent many had become to notice climate fatality, however any individual can't act unless everyone start to act.

Now necessary emergent climate fixing are **Arctic Cooling Engineering** and **more than 80%CO2cut**. It is almost **global war time regime life** where people should consider it best to scarcely to eat and sleep.

Certainly the implementations are outrageously difficult, however coming climate hell is more outrageous. People could do their best if they had recognized the coming reality.
