

How to Accomplish Global Climate Action toward Effective Fixing.

Central Governments would be busy in warfare, while other policy be paralyzed. 2017/8/2.

Now strong evil power has been accelerating climate worsening toward **5 billion people extinction**. They interfere climate **scientist IPCC** and hide deadly climate fact. They threaten also business-media society to hide, so people has entirely been being deceived. Also politics will not work for climate fixing. **Paris Accord** is hypocrite not to save people. **The final chance may be creating global justice power from bottom sides with the truth.**

DEADLY CLIMATE FACT(Plan A-B)APPROVING by Global Voting

A : Recovering Stable Climate by Rapid 80%CO2 Cut as Global Policy.

B : Arctic Cooling Engineering to Stop Methane Catastrophe.

GLOBAL CLIMATE- WARTIME DECLARATION

toward Rapid Regime Change for Non Carbon Energy Society

STARTING IMPLEMENTATION “A” by International Team.

(5) **Organizing General Headquarter=A** with the staff and supporting politician
Plan Declaration and the Management.

(6) Design= Technical Research and Development on **ARCTIC COOLING TECH.**

(7) Fund Rasing and Ordering Machines and Workers.

(8) Starting the Implementation and the Running in Arctic Ocean.

<http://www.ameg.me/>

<http://www.777true.net/Arctic-Cooling-Engineering-the-Summary.pdf>

STARTING IMPLEMENTATION “B” in each Regions in the World.

(1) **Organizing General Headquarter** with the staff and supporting politician.
Plan Declaration and the Management.

(2) Rationing on Carbon Energy with the **Target** of Increasing **New Energy**.

(3) Industry Rearrangement with the **Needs** and the **Employment**.

(4) **People’s Job & Life Assurance** in Employment Transition.

<http://www.777true.net/100pct-Renewable-Energy-is-Possible.pdf>

<http://www.777true.net/Life-Assurance-by-National-Strategy-in-coming-climate-WAR-TIME.pdf>

<http://www.777true.net/Rapid-CO2-Absorption-with-Mineralisation-of-CO2-by-OLIVINE.pdf>

[1] : **That will not do,so we can not help,but do this !!.**

If,very very if,a very small planet inhabitants was few family with emitting CO2 to cause climate change,they would make meeting to cut CO2 and would act to employ wind turbine. A smaller society with face to face relations seems to be easier in making serious and decisive agreement on their surviving.

While real our planet is bigger and difficult enough to make the agreement. **Then,how to overcome the difficulty ???!**

[2] : **National Government will not do,so we can not help,but do by City !!.**

Not only author,anyone the concerned may have been desperate the government not saving people who has been facing the ignored,but deadly climate crisis.It is substantially **WWIII** now heading global extinction.However we have another powerful instrument. Those are **regional local governments** with country governors in the world.Even global insidious CIA network could not grasp whole country administration with regional peoples.

Global warming is inevitable and 5 billion until 2043 , , may die if nothing is done in time ,and they are hidden from worldwide population .. says Jocelyn Luz

<http://www.jucelinodaluz.com.br/aquecimento-global-inevitavel.htm>

He may be only one who could have image of 5 billion people die.The coming 2043 would not be due to CO2 global warming in rather slow tempo,but to rapid collapse by Arctic methane catastrophe.

<http://www.777true.net/Scientifical-Mechanism-of-Prophecy-by-Paranormalities.pdf>

U.S. Mayors Back 100% Renewable Energy, Vow To Fill Climate Leadership Void.

<https://popularrresistance.org/u-s-mayors-back-100-renewable-energy-vow-to-fill-climate-leadership-void/>

The U.S. Conference of Mayors also voted to support quick electrification of vehicles and urged Congress to back the Clean Power Plan and Paris climate agreement.

9.8 Million People Employed By Renewable Energy May 27, 2017

<https://popularrresistance.org/9-8-million-people-employed-by-renewable-energy/>

[3] : APPROVING PLAN(AB) toward Climate Wartime Declaration.

Regional School,University & Co Engineers-Economists could be the Leaders ?!!

At first, note everyone must know that ,above all,this is the deadly supreme problem of do or die !!! . Thereby everyone must join in **the supreme decision making yes or no on climate wartime declaration**.It is recognition that climate problem is decision on own coming fate. In order to accomplish it,the sufficient information must be disclosed to everyone.

(1)Associate Climate Expert=Regional Education Institution Should Have the Class.

The most troublesome problem of climate is necessity of the knowledge.For an example, to get understanding what [here](#) tell needs climatology **with math & physics**.However those who had been educated such science could understand and they are not rare.They may be **students,teachers,researchers and engineers = the leaders = Associate Climate Expert**.

Part-1:Deadly Climate Facts the Verification.

<http://www.777true.net/The-Broken-Paris-Accord-is-Final-Chance-to-Transit.pdf>

Those who could have understood should be lecturer for people toward **climate policy decision**.Full comprehension is desirable to promote full cooperation in implementing the Plan B.Then note educating those without sufficient science knowledge needs special technique.It need something **manual** to teach amateur.

*For an example,a math calculation is easiest,because if calculation result is right, It is the same for all.Thereby everyone does not need calculation ability.Only trust it.

For amateur, math should be taught as language with **meaning**,which is very important.

*However **original model building** with some hypothesis and approximation for calculation is not unique and only,so this is work for expert and it needs verification test.

<http://www.777true.net/Overwhelming-Judgment-of-SCIENCE.pdf>

(2)Introducing **climate hell world reality** is inevitable, **which has insidiously been being hided and taboo in the world.**

**At first,,Ask the climate experts *true or false*
*whether climate hell would cause 5 billion dying ?!!!***

Regional council should invite climate scientists to **testimony yes or no** on climate fact(AB).

Then the scientists and **the leaders** must make **full debate** toward climate wartime

declaration.We must decisively recognize that climate collapse is far more any wars in the history.Because our failure would cause 5 billion people dying. It is this deadly recognition that enable **global climate wartime declaration** to trigger rapid and drastic regime change.

Anytime for long coming years,we must not forget that this is supreme problem of do or die.

(3) **Climate never be cured at soon, but it would take decades years to recover stability.**

Global temperature with climate disaster would rise for the time being by realizing even 80% CUT. Then people would hesitate and be uneasy for their strong endeavoring.

At first, people must recognize this severe fact. See at here.

I : Time for Plan B Cutting Carbon Emissions 80% by 2020

<http://www.777true.net/The-Broken-Paris-Accord-is-Final-Chance-to-Transit.pdf>

(a) About 20 years to stop temperature rise.

(b) About additional 40 years to recover temperature at now.

(c) Something revolutionary technology could make this tough period shorter.

<http://www.777true.net/Rapid-CO2-Absorption-with-Mineralisation-of-CO2-by-OLIVINE.pdf>

[4] : How to Make Global Unite by Regional Actions (New Energy FIFA = GHQ A).

(1) **New Energy Show Game = FIFA World Cup Soccer Game System.**

<http://www.fifa.com/>

This is **a supreme game of do or die**, but anyone all could become winner !!!

Each region is a team to win CO2 cut score, then accomplishing 80% is the winner.

This is a strict game with umpire, assistant and with scorer and game time keeper.

As for not accomplishing 80% team, they should be supported by regions the winner.

(2) **a team of united region.**

Each region has each peculiar situation with strong or weak points. So each regions could make **a team of united region** to compensate with each others for accomplishing 80%.

(3) **How to Organize World GHQ = B International ?!!**

It might be best that global united action could be accomplished without specified leader, but with well organized ensemble by the umpire, assistant, scorer and game time keeper.

This is authors an instant idea, so also readers should survey another better methods.

(4) **Cost of New Energy would become lower in the climate wartime regime.**

Because national strategy would order **mass production of new energy instruments.** That is, new bigger market creation could make also new employment which could relax employment transition from old energy industry.

[5] : Arctic Engineering is Big Drama as Miracle Exodus by Moses.

How to Organize World GHQ=A International ?!!(Arctic Methane Risk the Hidden).

CO2 reduction has been being debated in the world,while Arctic Methane Risk is very rare. Why not ?.In hidden fact,this is hidden instrument to exterminate mankind(operation EndGame).At that time of finding methane extinction risk,scientists had become desperate, because they had no idea of salvation by geo-engineering possibility.Now this failure momentum has been going on. IPCC(UN) will not disclose this emergent fatal risk.Certainly this is rather difficult problem for general people.However some conscience scientists has been warning on.

So far authors survey,now **AMEG(UK) is a leading team on Arctic Methane Risk.**

<http://www.ameg.me/>

This project could not be accomplished by a nation,but by global united nations.

Because the engineering scale is outrageous as few 10% area or more of Arctic region.

The cooling technology could not really be told complete,but with rather uncertain.

The R&D and implementation-running cost is big as billion to trillion dollars.

<http://www.777true.net/Arctic-Cooling-Engineering-the-Summary.pdf>

Now AMEG failed in support petition to nation leaders on Arctic Cooling Engineering R&D.

Once again,we global regional group with AMEG must try to make petition to each nation leaders.

This is the most emergent problem to accomplish.The game time keeping is decisive.Above all,climate scientists group must approve and assist Arctic Cooling Geo Engineering.Also related engineering company in the world should survey the technology as coming big business chance.The rich enough corporate should survey the investment chance.

[4] : Bottom Up Method the Summary.

Also author don't exactly know about following problem.

(1)The Model All USA Mayor Ally Tackling Climate.

<https://popularresistance.org/u-s-mayors-back-100-renewable-energy-vow-to-fill-climate-leadership-void/>

It is this deed that Make America Great Again,of which method could save the world. .

This is **the best news in climate policy**,while almost world established media had ignored.

Also even websites do.Especially Europe,Asia,South America and Asia must notice !!!

(2)It will not be success, unless all the world would **go together**,then the final key may be **Global Declaration of Climate Wartime Regime. Caution** it is not the preparedness that enable the declaration,but it is the declaration that accelerate the preparedness !!

Reading history of war would affirm this fact !.

This is deadly emergent **problem of do or die**,so everyone must make the idea and action. The bottom up decision from all each regions may be possible to act.At first,university, school,company and town and village with semi expert supporter may be possible to make the decision on do or die. **Then what,or who would intercept this action ???!(APPENDIX-3)**

(3)**New Energy Transition** with reducing CO2 should be Show Game by global regions.

It is hybrid of competition and cooperation that could accomplish target in time.

<http://www.777true.net/100pct-Renewable-Energy-is-Possible.pdf>

(4)**Industry Rearrangement** with the Energy and Employment Transition.

This is Economics Calculation for Planed Economy by experts.

It is inevitable that some corporate would grow,while some would decline.

<http://www.777true.net/Life-Assurance-by-National-Strategy-in-coming-climate-WAR-TIME.pdf>

(5)**Foods and Water Saving** in Coming Wild Climate Era.

The most serious difficulty is **agriculture** in coming wild climate era. Thereby the preparedness is decisive for everyone. Some regions(nations)face desperate in this problem by strong storm,drought and flood. Then **climate emigrant would be inevitable for coming long years ? !**.

(6)Mind Preparedness for Climate Wartime Life.

Both suffer and joy may be necessary !!.

(7)**INTER-NATIONAL CLIMATE ENGINEERING OPERATIONS**

Author don't know well about following technology,but these are decisive.

(a)**ARCTIC COOLING OPERATION : [5]**

(b)**Desert Forestation for creating Farm Land.**

<http://www.climatecentral.org/news/desert-basins-missing-carbon-sinks-21557>

<https://www.groasis.com/en/planting/can-you-plant-trees-and-vegetables-in-dry-areas>

<http://satavic.org/natural-farming-succeeds-in-indian-village/>

<http://www.sabakuryokka.org/about.html>

(c)New Foods Seeds R&D toward adaptation for coming climate era.

<https://pdfs.semanticscholar.org/01f5/ce396f601c555930c3c8d3c0d239168b68d9.pdf>

(d)Defense technology for big forest fire.

<http://arctic-news.blogspot.jp/2017/07/wildfires.html>

(e)R&D toward adaptation in coming ocean warming and acidcation era.

*At now,there is no evidence of **CO2-sink ability decline** in global ocean(2017/3/29).*

https://www.spf.org/opri-j/projects/140_KaiyoF_Summary.pdf

APPENDIX-1 : Climate Wartime Regime at a Glance.

<http://www.777true.net/How-to-sale-the-Climate-Policy-hated-by-All.pdf>

APPENDIX-2 : Never make any military wars in coming years, because it would destroy climate wartime regime.

Thereby,those many regional disputes in now world must be ceased by anyhow.

In this meaning,it is **global climate wartime declaration** that could act to cease fire.

Because winning in regional dispute is nonsense,if climate hell would have been realized.

Note the cruel and insidious wars in Middle East Nation were due to **9/11 the inside job by the warmonger in USA**(it is they who has been operating **End Game** the final survival struggle).These disputes have another aspect of hiding climate collapse.Because if the world would have become peace,what would have become main problem in the international politics ?.It is nothing,but the climate worsened.Now climate is substantial and extremely insidious **WWIII** heading global extinction,while we are still too stupid to be indulged in carbon energy narcotism.

APPENDIX-3 : Who,What would Intercept the Action ???!

From published documents and disclosed information by websites,we could conclude that climate has been being worsened by an evil power **toward global mass extinction**.It is oil industry with the emperor in USA,who once supported **NAZIS** establishment and imported them with war technology after the war for establishing CIA-military industry complex(**the warmonger**).Their ideology is eugenics considering people their **slave**.

At now,this may be kernel problem to be noticed and overcome.

(1)Operation EndGame

=**Planned Extermination of Mankind by NAZIS reincarnated in USA.**

<http://www.777true.net/Arctic-Methane-Extinction-is-Revealed-to-be-Operation-EndGame.pdf>

*It's Climate Change that is Silent,but **Actual WWIII** Exterminating 5Billion People.*

Why IPCC Scientists has been Silent on Arctic Methane Risk.

(Official Movie w/ Subtitles) THRIVE: What on Earth Will It Take?

<https://www.youtube.com/watch?v=0MSEHQVRlUg>

https://www.youtube.com/watch?v=bM_vkV6bXi0

Some minor has been ruling mass people in (foods,energy,finance,health,education,..}
toward depopulation.

(2) Why Central Government will not Work ?! = NAZIS has been Conquering Nations.

So far authors survey, most of governments seems to act toward growing militarization-police state-nization with mass media the war & terror propaganda machine due to conspiracy by **the warmonger USA** (false flag terror and regional wars). Note war crisis could become **the highest priority** for any government toward paralyzing other policy (climate). It is these evil strategy that has been making America the worst in the world..

Operation Condor = USA Imperialism ruling on South America.

Operation Gradio = USA Imperialism ruling on Europe.

Operation XXXX? = USA Imperialism ruling on Asia..

<http://www.777true.net/Global-People-Must-Search-an-Essential-Evile-Origin.pdf>

<http://www.777true.net/Oil-and-Military-the-Deathperate-Industry-has-been-causing-the-worId-desperate.pdf>

<http://www.777true.net/Suppressing-Mechanism-on-Climate-Activating.pdf>

(3) Strong Momentum of Conservatism in the Established Society.

Once people had gotten something success to be rich, they try to sustain the way which had caused the success (American, European, Asian, ... **capitalism success** after the war). It is this that has been causing a strong momentum. (However it is this success that had caused climate collapse now heading outrageous global extinction). Then those who had gotten wealth and the follower will **ignore and suppress the deadly failure**.

People follows a strong big momentum in a specified organization at that time. Most of people could not resist against strong conservatism ruling organization. Employee tend to follow mood of company major opinion. Even scientist who sell truth follow their society major opinion even it is not justice. They fear losing their position. However at anytime, there is minor hero the ability who fight against injustice.

(4) Turning Difficulty from Beneficial Civilization to Humble One.

Oil civilization with fuel engine system had succeeded to liberate heavy muscle work from mankind, and presented people comfortable motorization, etc. Now it has been acting as strong anesthetic drug for **pain** in climate collapse now heading global extinction. Now wind and solar the alternative energy could be strong enough to **sustain minimum civilization to survive**. However we could not help, but admit it is rather humble than oil fuel. Those who complain, or think of such matter don't wish to know outrageous suffer of coming climate hell world. Telling climate fact is to face hostility from the major(??) who don't care it.

(5) **Strong Conservatism in Academy the Research and Educational Institutions.**

At first, those who have the ability to make the decision must do so by making strong and big unite.

The strong solidarity making is a kernel in fight !!!.

* Following are authors guessing, but not real document by interview.

(a) In fact, university and school don't teach deadly climate facts, but substantially ignore.

If not, their population is sufficient big to change opinion of society and nation.

At first, **massive students** who pay high fee must protest **the injustice**.

College graduate must solve also the problem not written in text books.

(b) **None Climatology Professor and Teacher.**

Their population and ability may be sufficient to change the opinion. Certainly role of the

official **IPCC** scientists document is strong to rule the opinion, however it is wrong or

incomplete as for **the deadly climate fact=AB**. They must notice the deadly injustice.

http://www.777true.net/The-fatal-failure-of-IPCC-climatology_Why-is-IPCC-impossible.pdf

<http://www.777true.net/Nothing-scientists-declaration-on-deadly-climate-facts-has-been-intercepting-the-salvation.pdf>

http://www.777true.net/The-fatal-failure-of-IPCC-climatology_Why-is-IPCC-impossible.pdf

<http://www.777true.net/IPCC-the-injustice.pdf>

http://www.777true.net/It-is-not-politician_but-doctor_scientists_only-who-can-declare-patient_climate-worsened_to-urgently-go-hospital.pdf

(c) **Government Influence on Research and Education Policy.**

Mass media and educational institutions are target of strong surveillance of conservative government who rule their national budget. Maybe educational institution managers fear reaction by government. They must **be united** to be against the evil power.

(d) **Corporate must be changed drastically by admitting climate crisis.**

These are capitalism machines who entirely pursue **imminent profit** for annual stockholder meeting, and for salary payment for employee. Then many corporate with oil consuming hate climate, while some (new energy and, ...) welcome. In the long range view, but not imminent one, climate fixing would become benefit. Because nothing fixing is extinction. Thereby,

all corporate must pay for fixing cost by somehow with equality in capitalism competition.

The payment must include manpower contribution (**engineer and economist for climate**).

Some of them could be best contribution in climate technology and economics. Note

established market may be rather saturated to stop its growing. Climate regime change

could make drastic market change, where there would create many chances and decline.

(e) **In Case of Regions<How to Harmonize the Whole Order ?!!!>.**

Some regions has been facing imminent climate threat,who would approve plan AB.
While some regions are not so serious for the time being and rather not care for climate.
Then they must know that coming final stage of climate collapse is global extinction.
Some regions are willing to approve Plan AB,however they have no new energy resource.
Then,they must search regions who willing to cooperate them.Then regional information network must act to support.Above all,their **solidarity making** is decisive in global scale.

***Detached House :**

This type has possibility of even self making new energy system by solar cell,solar water heater and small wind turbine.Methane gas could be made from **garbage** flammable.

***House Complex in Urban City :**

This type needs connection to larger regular new energy faculty in outer city.Especially note that **hydrogen gas** with new technology enable its wide utility flexible and higher efficiency.**Oil to H2 gas conversion** is higher possibility by the cost reduction.

<http://www.777true.net/100pct-Renewable-Energy-is-Possible.pdf>

<http://www.777true.net/Life-Assurance-by-National-Strategy-in-coming-climate-WAR-TIME.pdf>

This is the final supreme war game of do or die,so there must be strict ruling to survive.

After all,they are to be soldier with commander,technical and livelihood supporter.

This is too big problem for author.So here is its simple introduction.

It is encountering difficulty that could create better way by our endeavoring.

Thereby once people admitted fact inconvenient,they could overcome those.

Trust and Bet it !!!.

(6) **NGO Climate Activist Organization.**

https://en.wikipedia.org/wiki/List_of_environmental_organizations

In this world,there are tremendous NGO Climate Activist Organization.Some are regional who has been facing imminent climate threats(sea level rising in ocean island nations).

So far authors limited knowledge,he could not find org whose agenda agree with Plan AB.

<Note Plan AB is not authors opinion,but belong to the conscience **UK scientists**>.

NGO seems not to have expert consultant on CO2 and Arctic Methane Risk.

Unified unique and only global policy is decisive to effective action,only by which actual implementation become possible.

(7) **It Is not Too Late !!.**

Now climate had become wild visible for anyone. Then someone once warned climate crisis about 10 years ago, now tell **time is running out !**. Certainly this is awful word also for author.

Even if ideal fixing operation had begun ten years ago, **climate at today would become wilder**. Because **planet warming could not stop immediately**, but take about 20 years long.

Then actual and most awful event is **positive feedback realization** in natural climate process.

This is impossible to stop, unless technological intervention (climate geo engineering).

Now it really exists as **Arctic Methane Catastrophe Risk** by the ice surface vanishing.

Ice has been decreasing, which is to enhance more sun heat input into black ocean surface to warm ocean water vanishing more ice. This is the most awful feedback realization at now !. Thereby, for intercepting the feedback, **Arctic Cooling Engineering is inevitable !**.

Scientists who found this deadly fact at that time did not know the engineering possibility to be desperate and silent. Very unlucky, this momentum has been going on even today.

Maybe also something threat has been suppressing the scientists (op End Game).

Certainly the engineering is outrageous scale of few 10% or more area of Arctic, however it is not impossible by today's **world wide ability and wealth**.

<http://www.ameg.me/>

<http://www.777true.net/Arctic-Cooling-Engineering-the-Summary.pdf>

Note it is this **most secret** by the warmonger (**operation EndGame** the final survival struggle **(the hidden, but substantial WWIII)** exterminating 5 billion people). **Those who don't care this problem is uncounscious cooperator of them**. Nothing operation would realize global extinction **before 2050**. Time is not so long !!.

Climate Fixing is not only CO2, but also **Arctic Cooling Engineering !!**.

<http://www.777true.net/Arctic-Methane-Extinction-is-Revealed-to-be-Operation-EndGame.pdf>
