

IPCC(UN) the injustice: we could not be saved !!

2011/7/3,4

Two decades IPCC activity had accomplished nothing substantial result of saving life on earth
In the while,It would become fatal that IPCC has been neglecting **crucial feedback process**,
such as **methane catastrophe possibility in Arctic**.

[2]:The Facts behind CCC.

Those are indications of accelerating **Climate Change Crisis(CCC)** due to our global huge CO2 consumption regime .If current momentum of prolonging the global regime was, **we would encounter more disasters as time goes on** .Consequently we must recognize failure of industrial revolutions accelerated by our global huge CO2 consumption regime.Note also American has been encountering unprecedented and drastic economy collapse with frequent abnormal CCC disasters. Also Europe could not be as they were in their past glory. For recent years long, Africa and Australia has been suffering by outrageous CCC,for which facts we(asian,european,north-south american) have been neglecting.

Those facts could not help to become denying our current strategy=(economy the 1st).Emergent strategy change must be done from "**economy the 1st to life the 1st**". By anyhow,we had made outrageous failure and sin that **we had terribly devastated natural balances for life on the earth** by demonism of excess industrialization(or demonism of capitalism the global tyranny).

Then note that the responsible IPCC(leader for countermeasure on CCC)has not been rational function.They now are corrupted. See **Hells Bells** in following site.

<http://www.climatesoscanada.org/blog/2011/02/17/the-real-weapons-of-mass-destruction-methane-propaganda-the-architects-of-genocide-part-i/>

The possible rescue is more than 80% CO2 reduction,which is no concern with our convenience. Either option of **prolonging current status(toward global suicide)** or of **revolution by global RAMADAN policy(efforts for co-surviving)** would become unprecedented tough life of all.

<http://www.777true.net/OPERATION-GLOBAL-RAMADAN.pdf>

Our future destiny would be depend on whether we could hastily admit **the outrageous our failures** ,or not. Then our kernel problem is what **the Moral Law** that causes the people to be in complete accord with their leader, so that they will follow him regardless of their lives, undismayed by any danger(**Appendix1**).

Appendix1:Sun Tzu, LAYING PLANS:

<http://www.chinapage.com/sunzi-e.html>

1. Sun Tzu said: The art of war is of vital importance to the State.
2. It is a matter of life and death, a road either to safety or to ruin. Hence it is a subject of inquiry which can on no account be neglected.
3. The art of war, then, is governed by five constant factors, to be taken into account in one's deliberations,when seeking to determine the conditions obtaining in the field.
4. These are: (1) The Moral Law; (2) Heaven; (3) Earth; (4) The Commander; (5) Method and discipline.
- 5,6. **The Moral Law causes the people to be in complete accord with their ruler, so that they will follow him regardless of their lives, undismayed by any danger.**
7. Heaven signifies night and day, cold and heat, times and seasons.
8. Earth comprises distances, great and small; danger and security; open ground and narrow passes;the chances of life and death.
9. The Commander stands for the virtues of wisdom,sincerely, benevolence, courage and strictness.
10. By method and discipline are to be understood the marshaling of the army in its proper subdivisions, the graduations of rank among the officers, the maintenance of roads by which supplies may reach the army, and the control of military expenditure.

Appendix2:Amateure policy maker never could understand IPCC summary report.

Outrageously,those has been intending not full comprehension ,but confusion with scilent by face of having understood.The more than 20 years activity of IPCC could not have accompli-shed any effectivte global rescue in emergent Climate Crisis.,but only global confusions. In such ways,we all would be in hell in near future.

For example,could you tell the meaning of **radiative forcing (RF)**

It's the very and very kernel concept of **Climate Change Criterion(CCC)**.

If you could tell in a minutes with everyone's comprehension,it would be genuine.

But otherwise,you know it effectively nothing, Only drastic global revolution could save this planet. It is too hard,but not impossible.

Appendix3:How to accomplish global comprehension.

(10) **IPCC Reasons for Concern**

<http://www.climate-change-emergency-medical-response.org/ipcc-reasons-for-concern.html>

Unfortunately, they leave out the grandfather of all concerns: **Arctic carbon feedbacks**.....
None of the carbon feedbacks is included in the models chosen by the IPCC for the crucial most likely global temperature increase projections. The feedback danger is not included in the IPCC reasons for concern.

The most dangerous carbon feedbacks by far are from thawing permafrost in the Arctic and subsea coastal methane hydrates, which will destabilize with global warming.

(1) **Climate change likely to be more devastating than experts predicted**

<http://www.sciencecentric.com/news/09021506-climate-change-likely-be-more-devastating-than-experts-predicted.html>

'There's a vicious-cycle component to both the tundra-thawing and the tropical forest feedbacks, but the IPCC fourth assessment didn't consider either of them in detail. That's basically because they weren't well understood at the time.'

Appendix 6: Fukushima Nuclear Plant Disaster by 3/11 Japan Earthquake.

This is not a natural disaster, but a historical conspiracy (terror attack) against democrat movement in Japan and also against international carbon reduction movement for Countermeasure against Climate Change Catastrophe. Global citizen never be deceived.

Nuclear Power Plant is unfavorable in view of safety against "terror attack", but also more Carbon Power Plant construction is more unfavorable. Both are not effective for CO2 reduction. Above mentioned details shall be reported before long.
